

# How to set up KAKAOPay

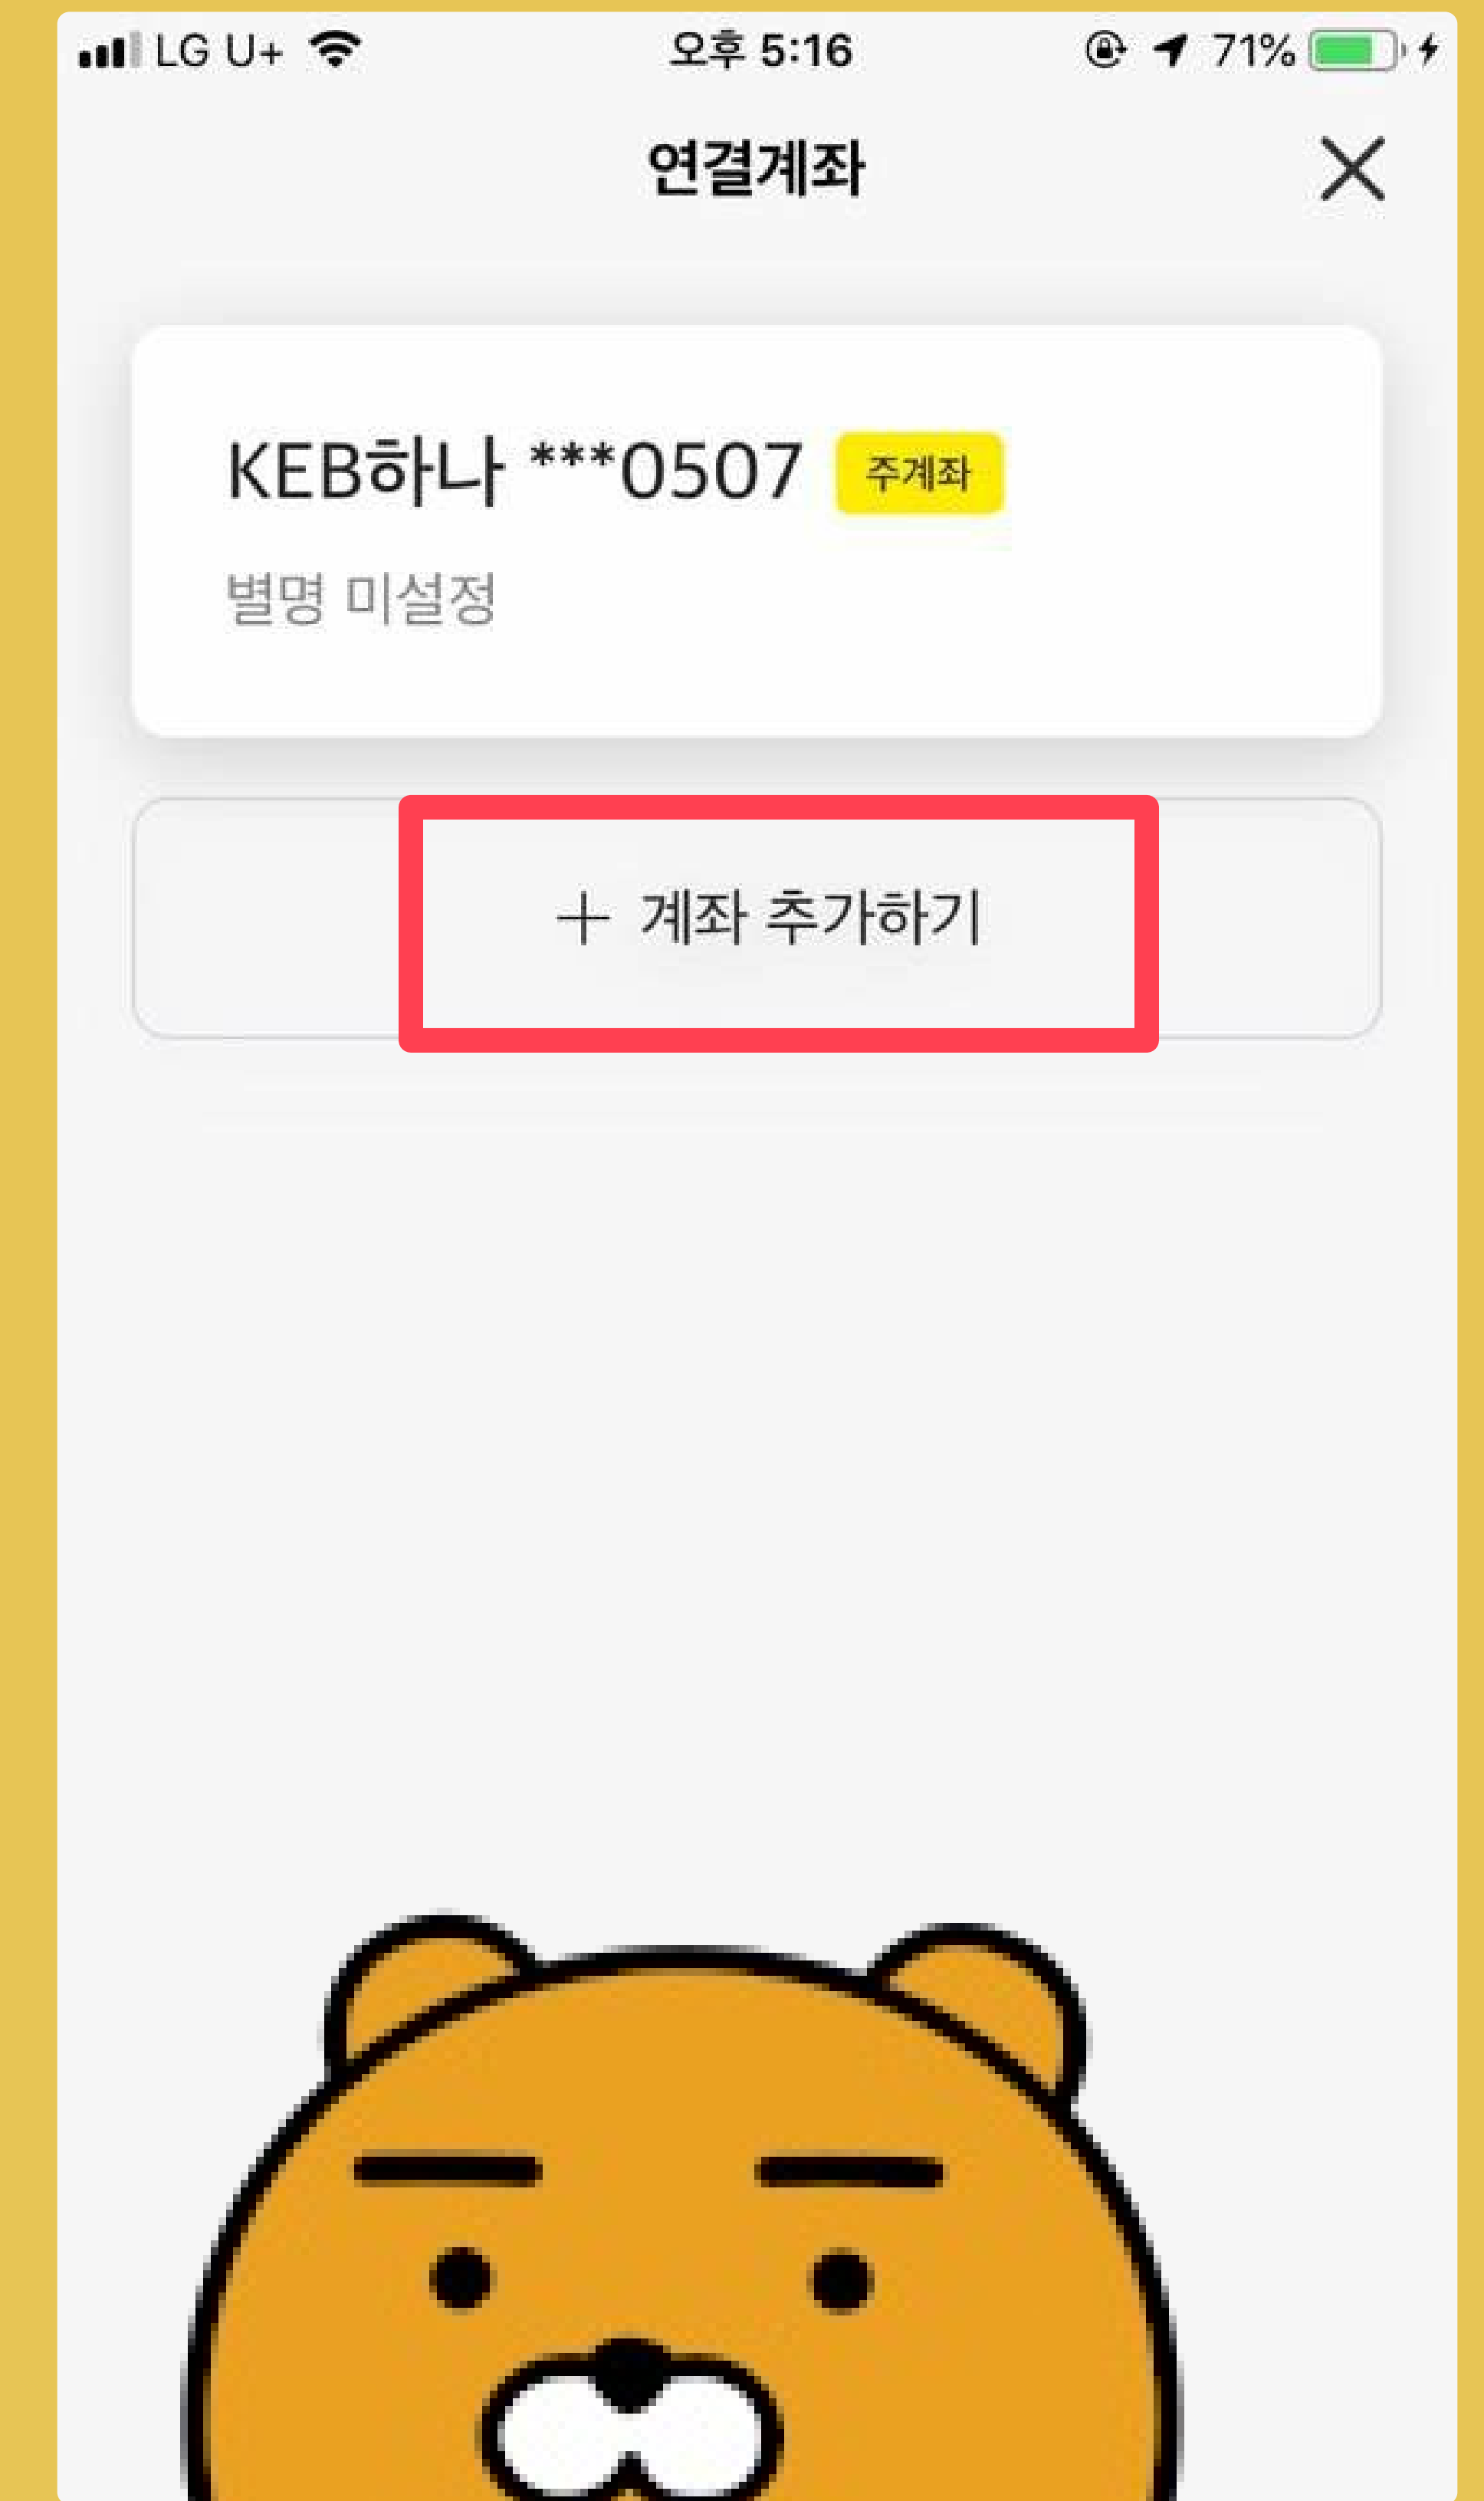

"송금" means "Remittance"

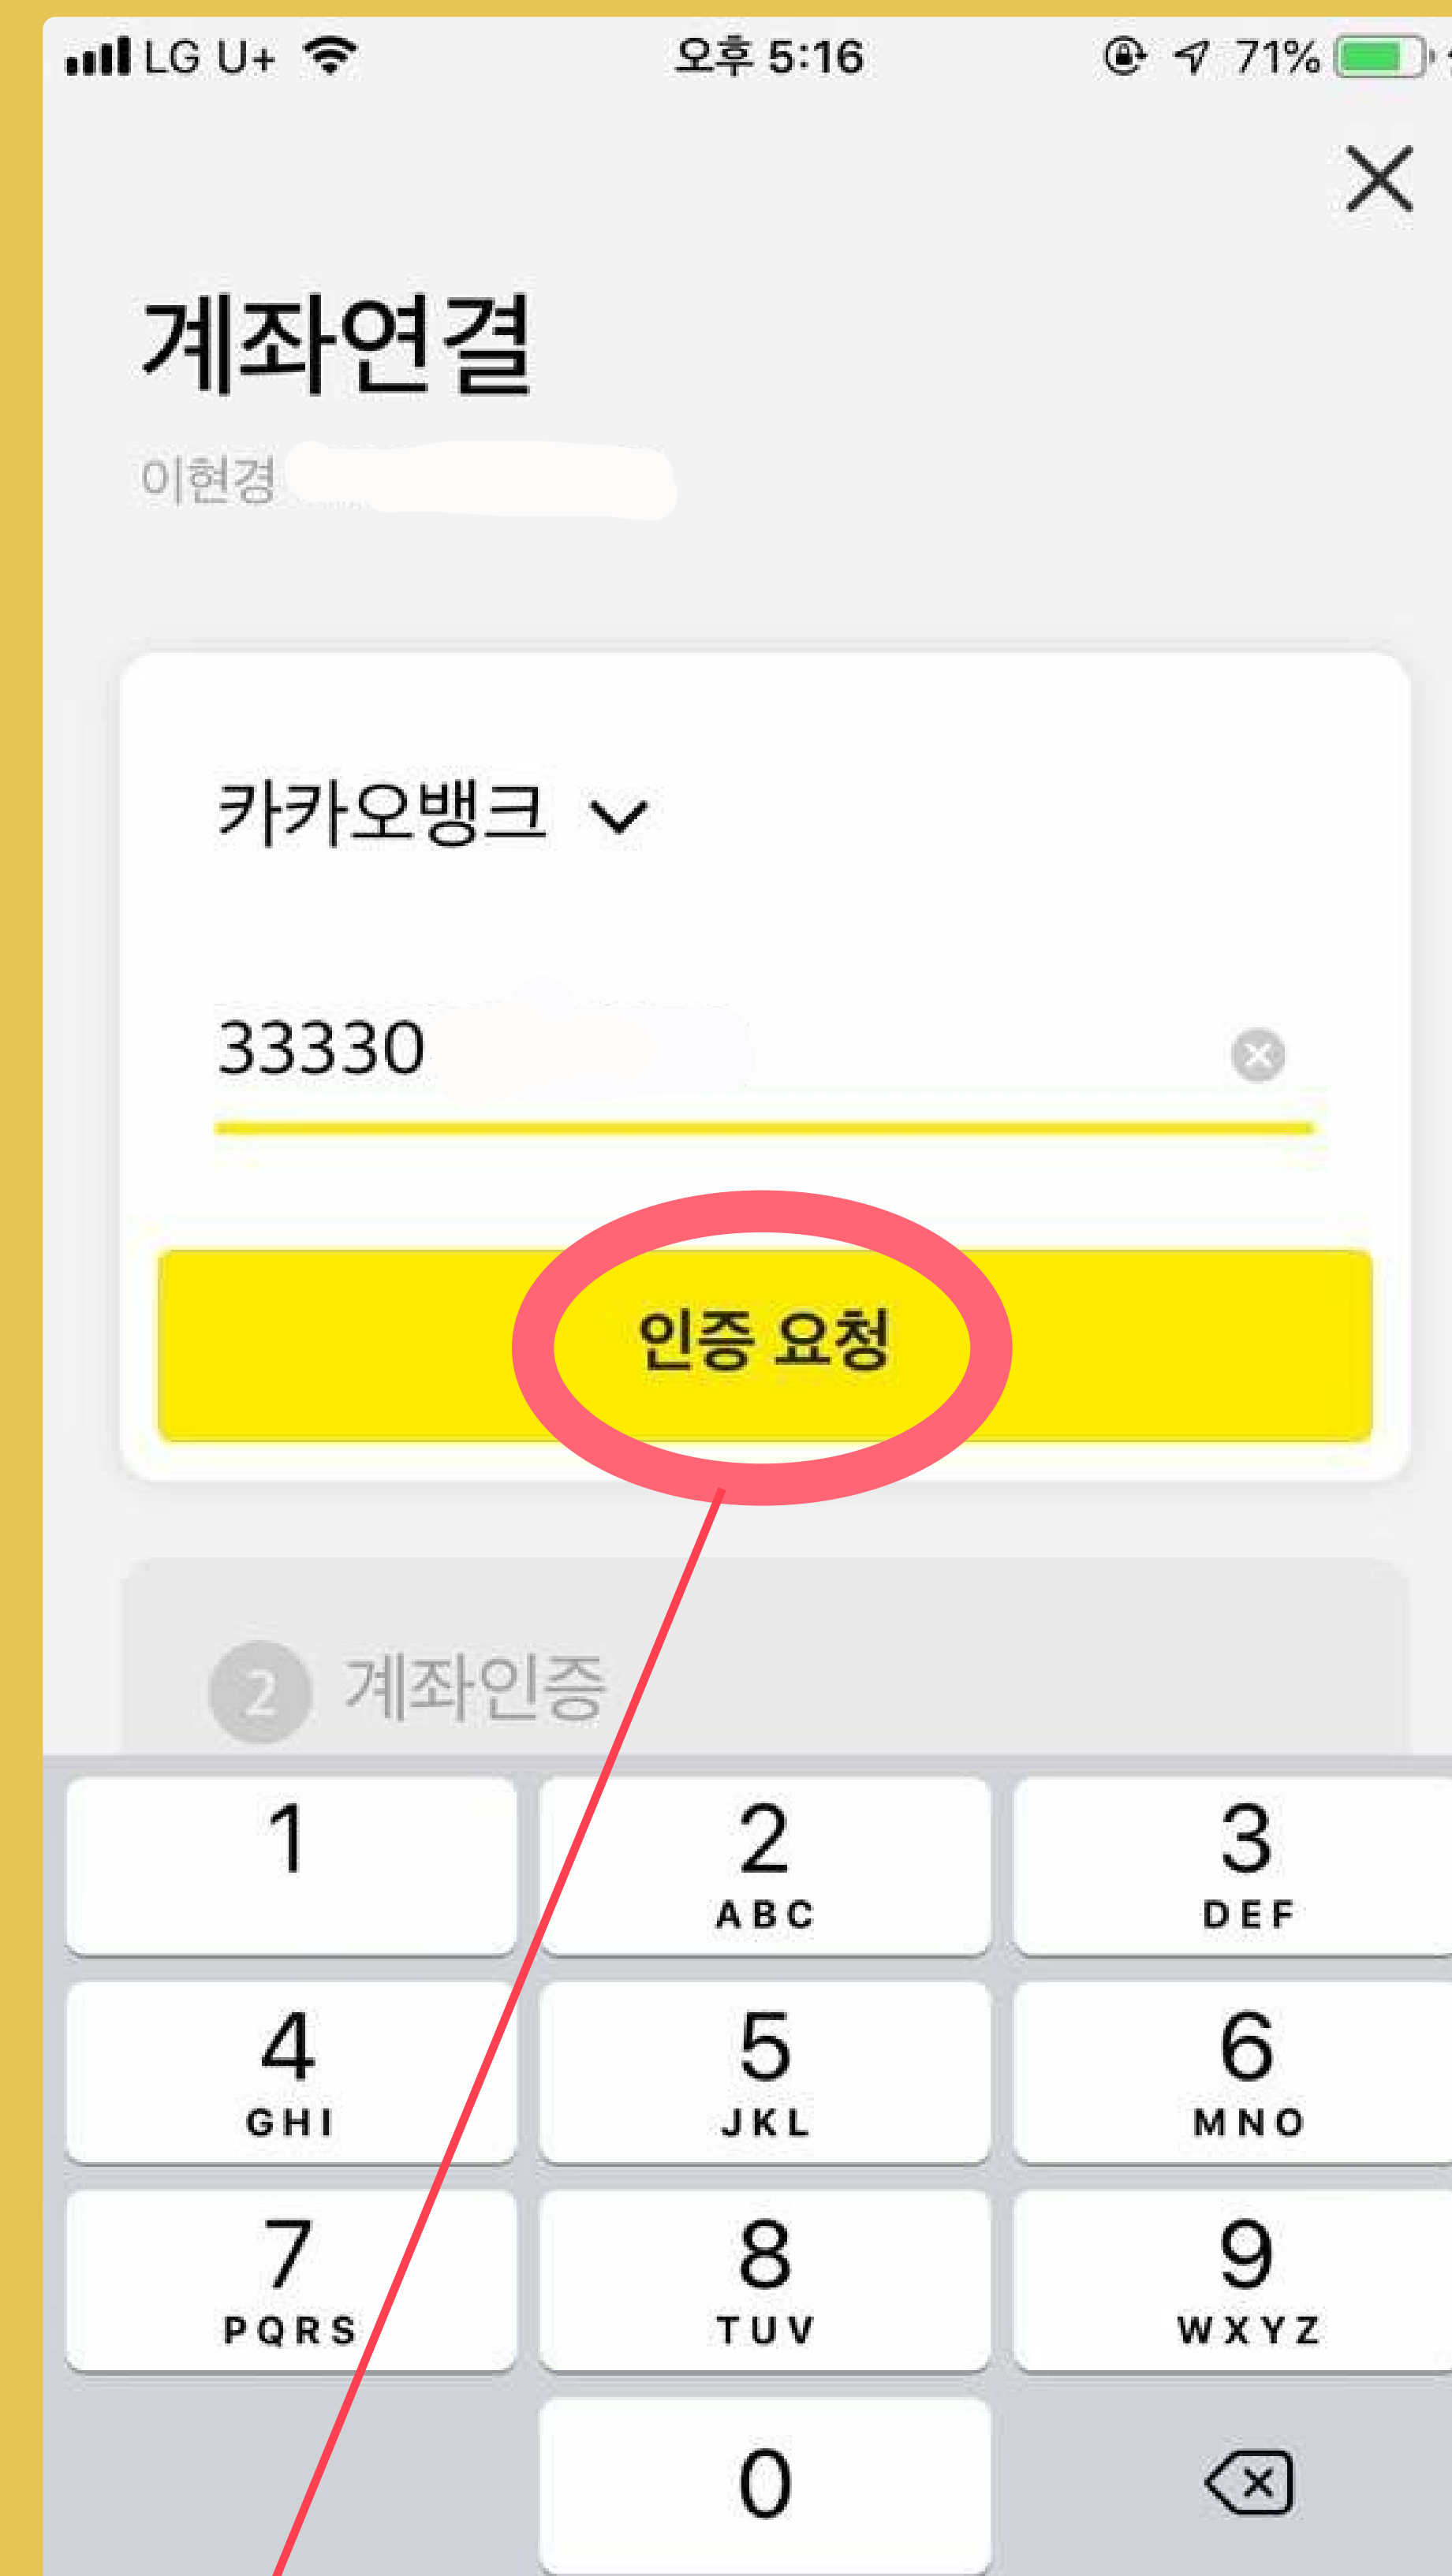

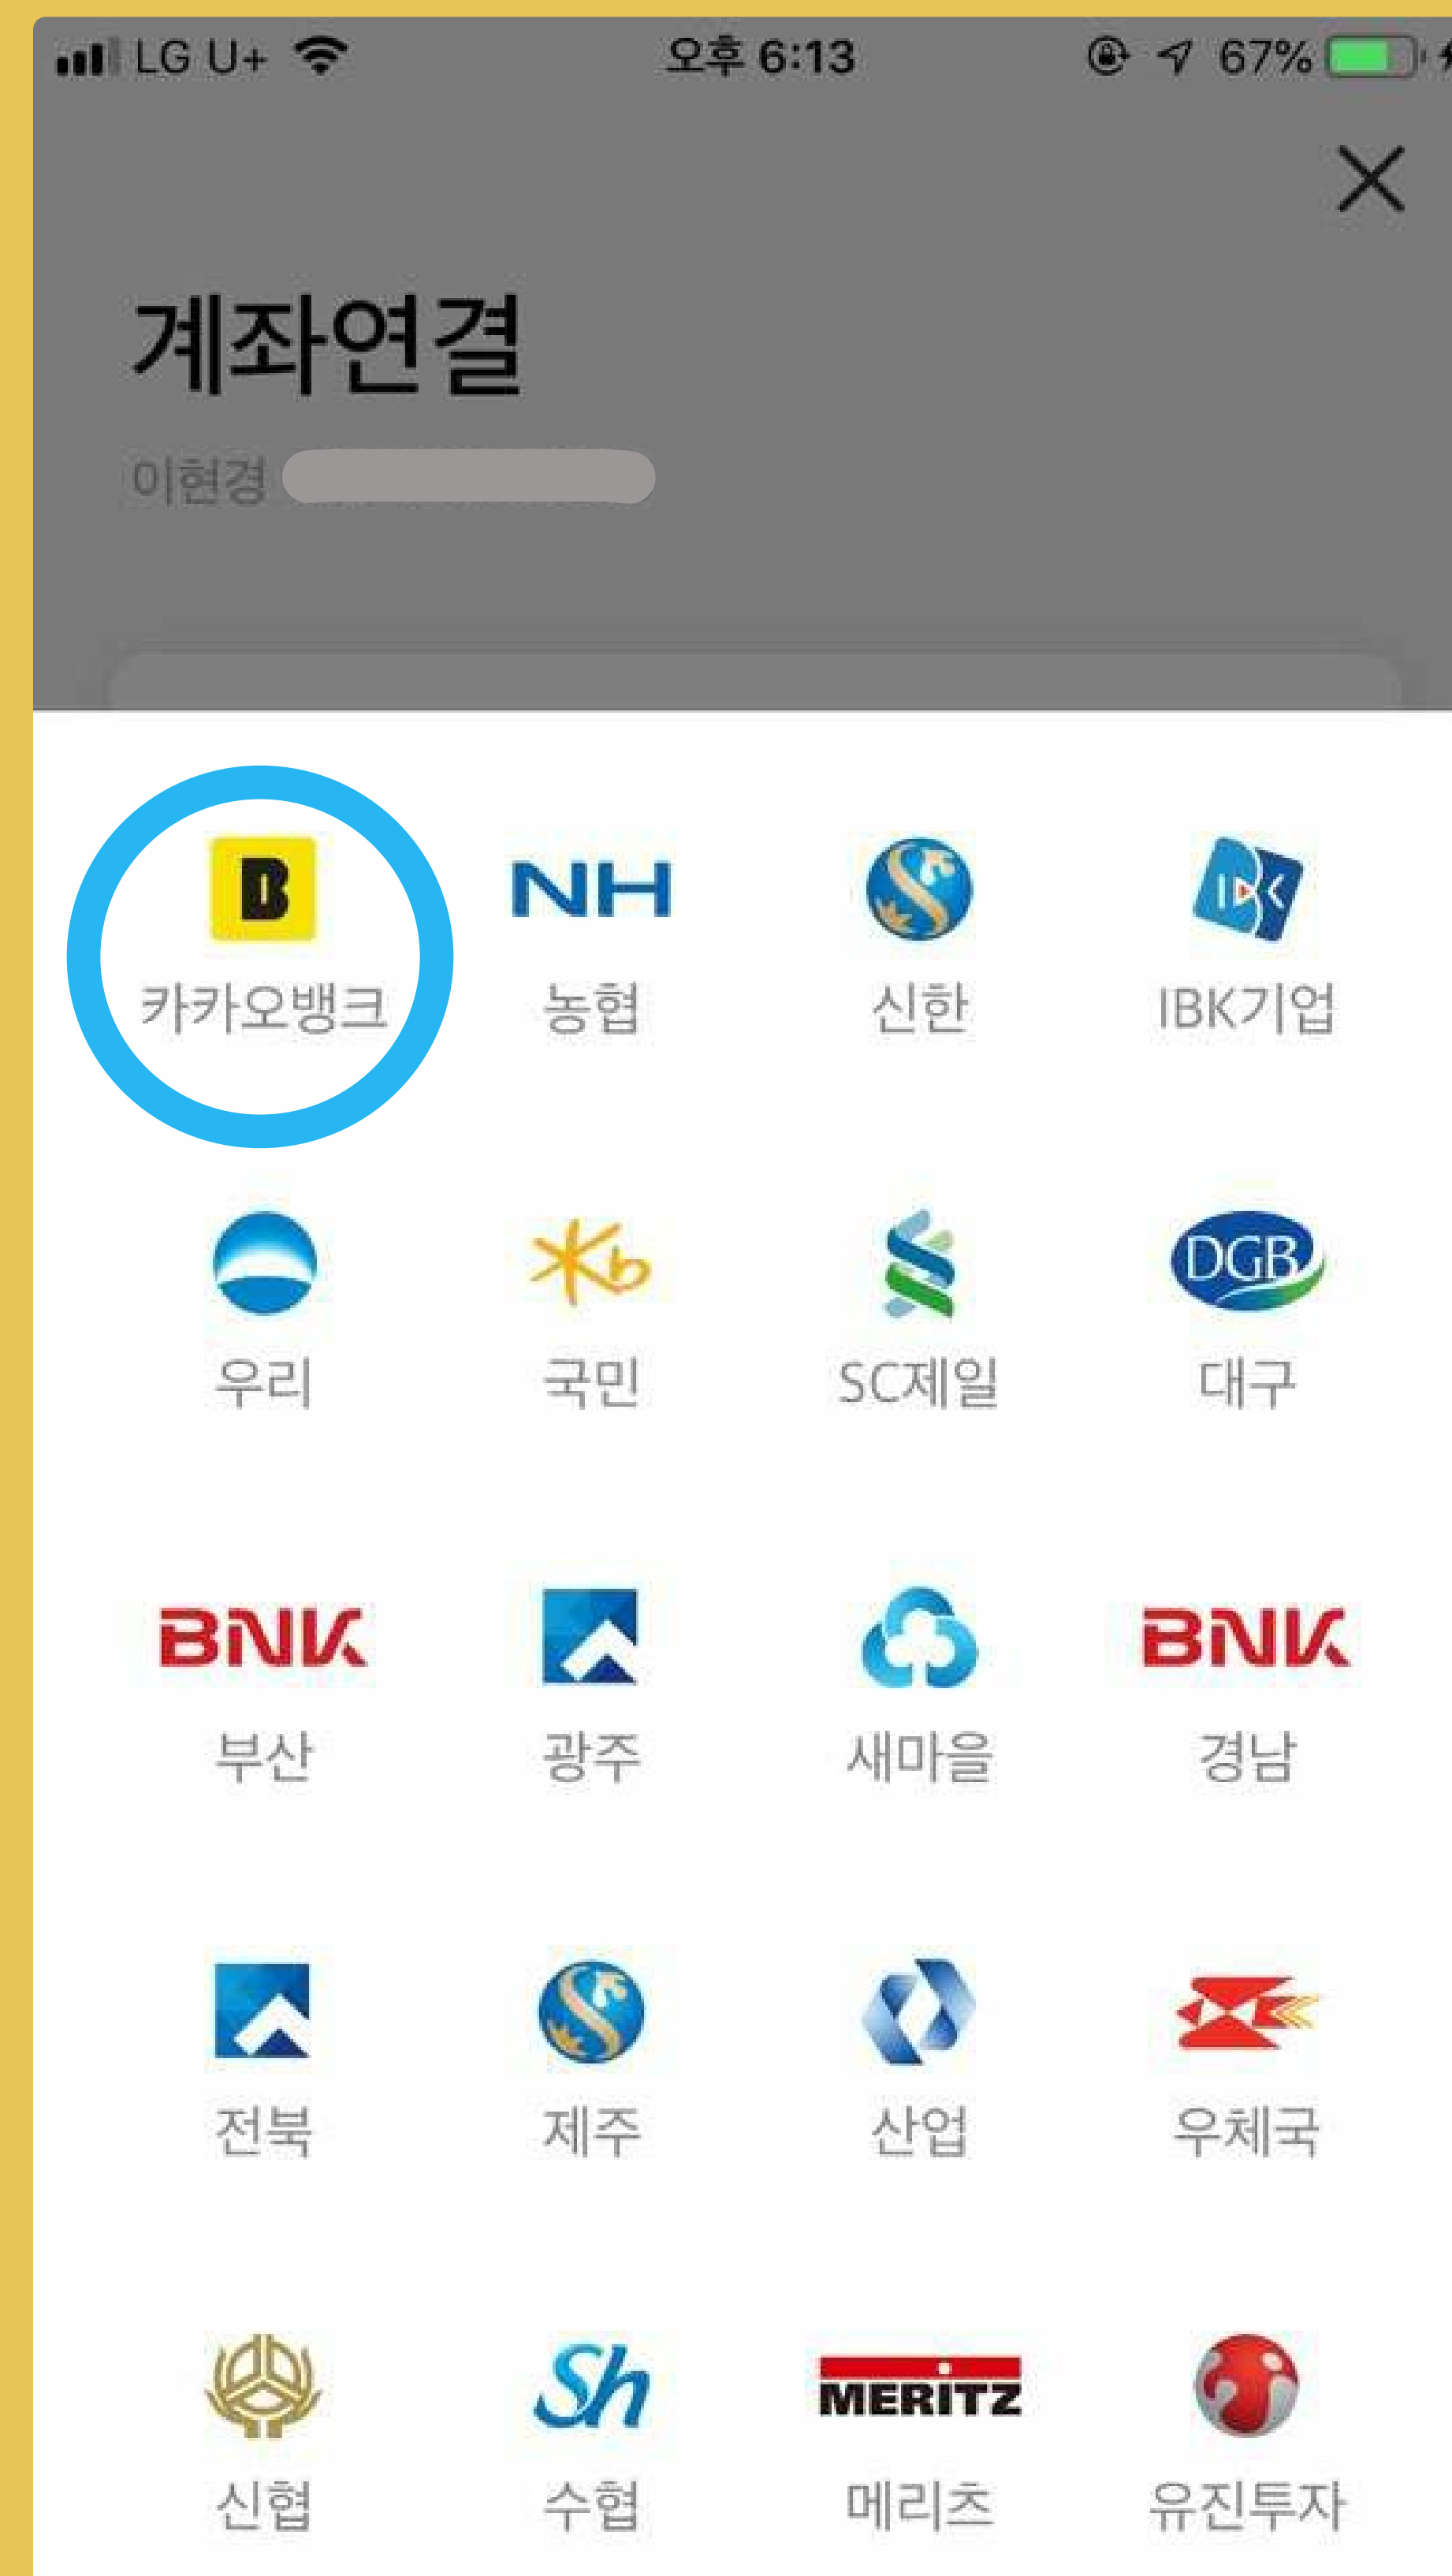

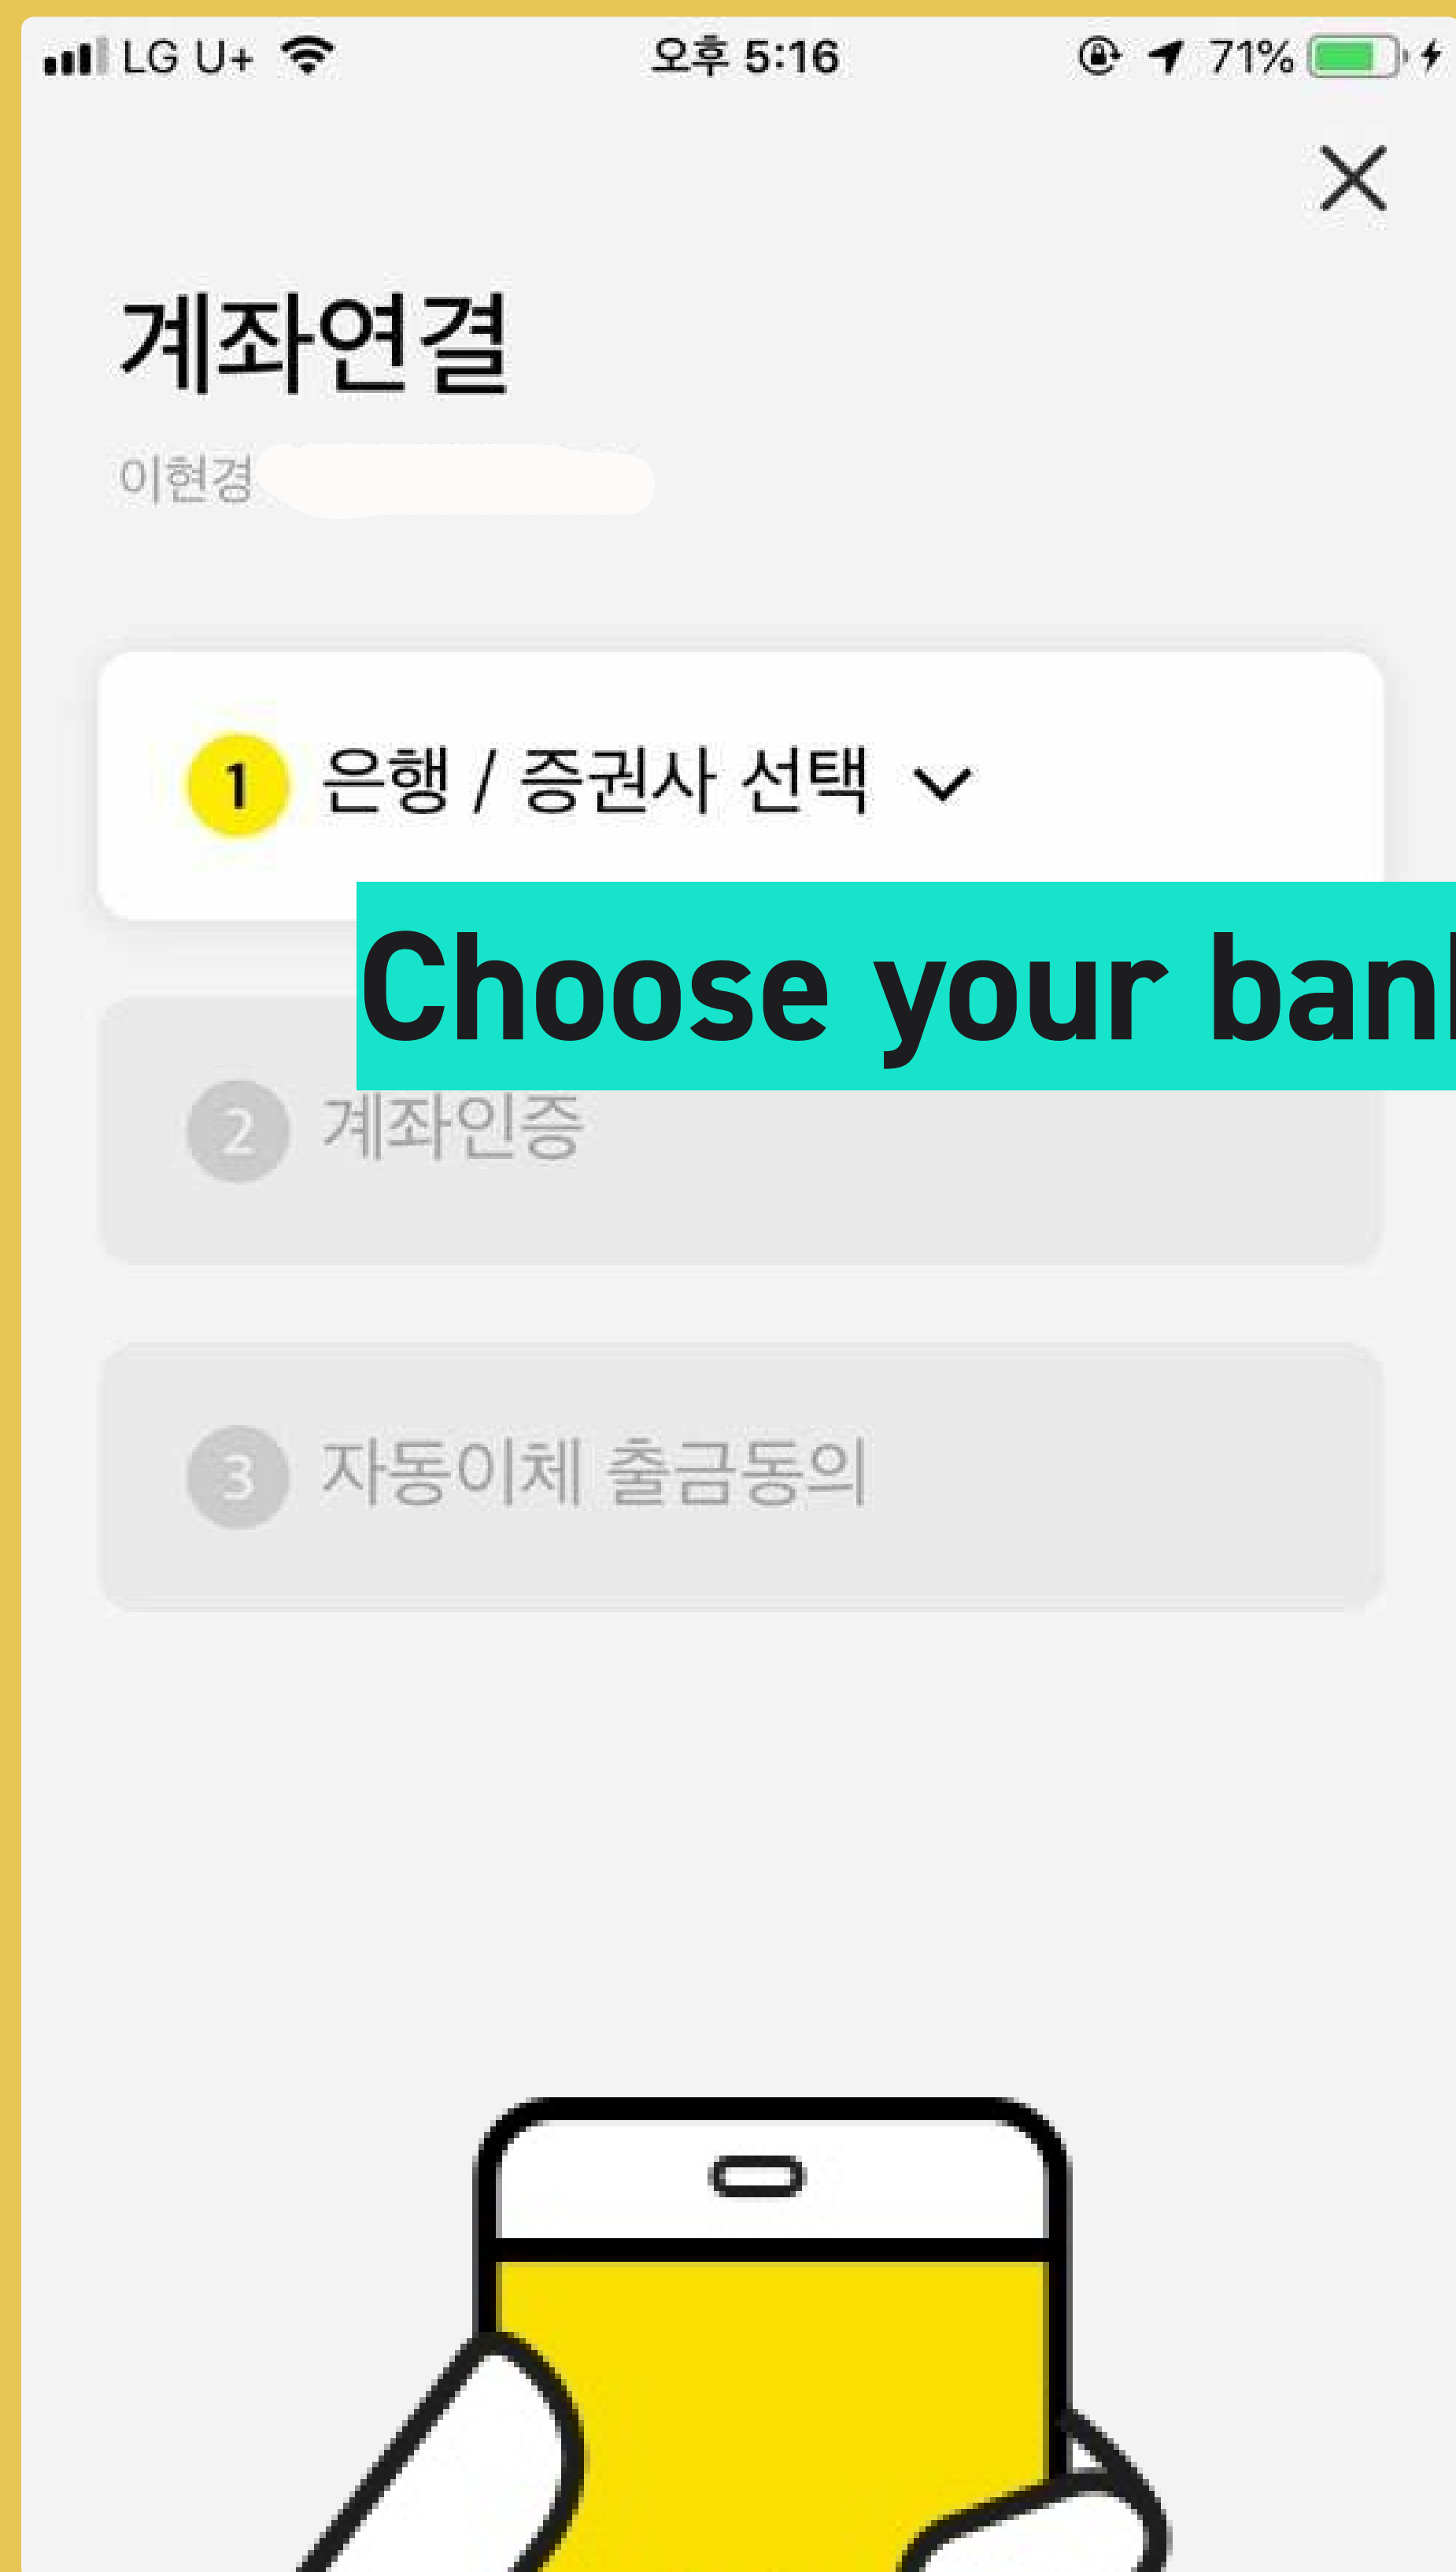

Connect your kakao with your korean bank accout, you can transfer money to your friends in Kakao or to anyone's bank with no bank certificate needed.

"결제" means "Payment"

Connect your korean bank account first, It will allow you to pay online/offline that any place offers kakao pay service.

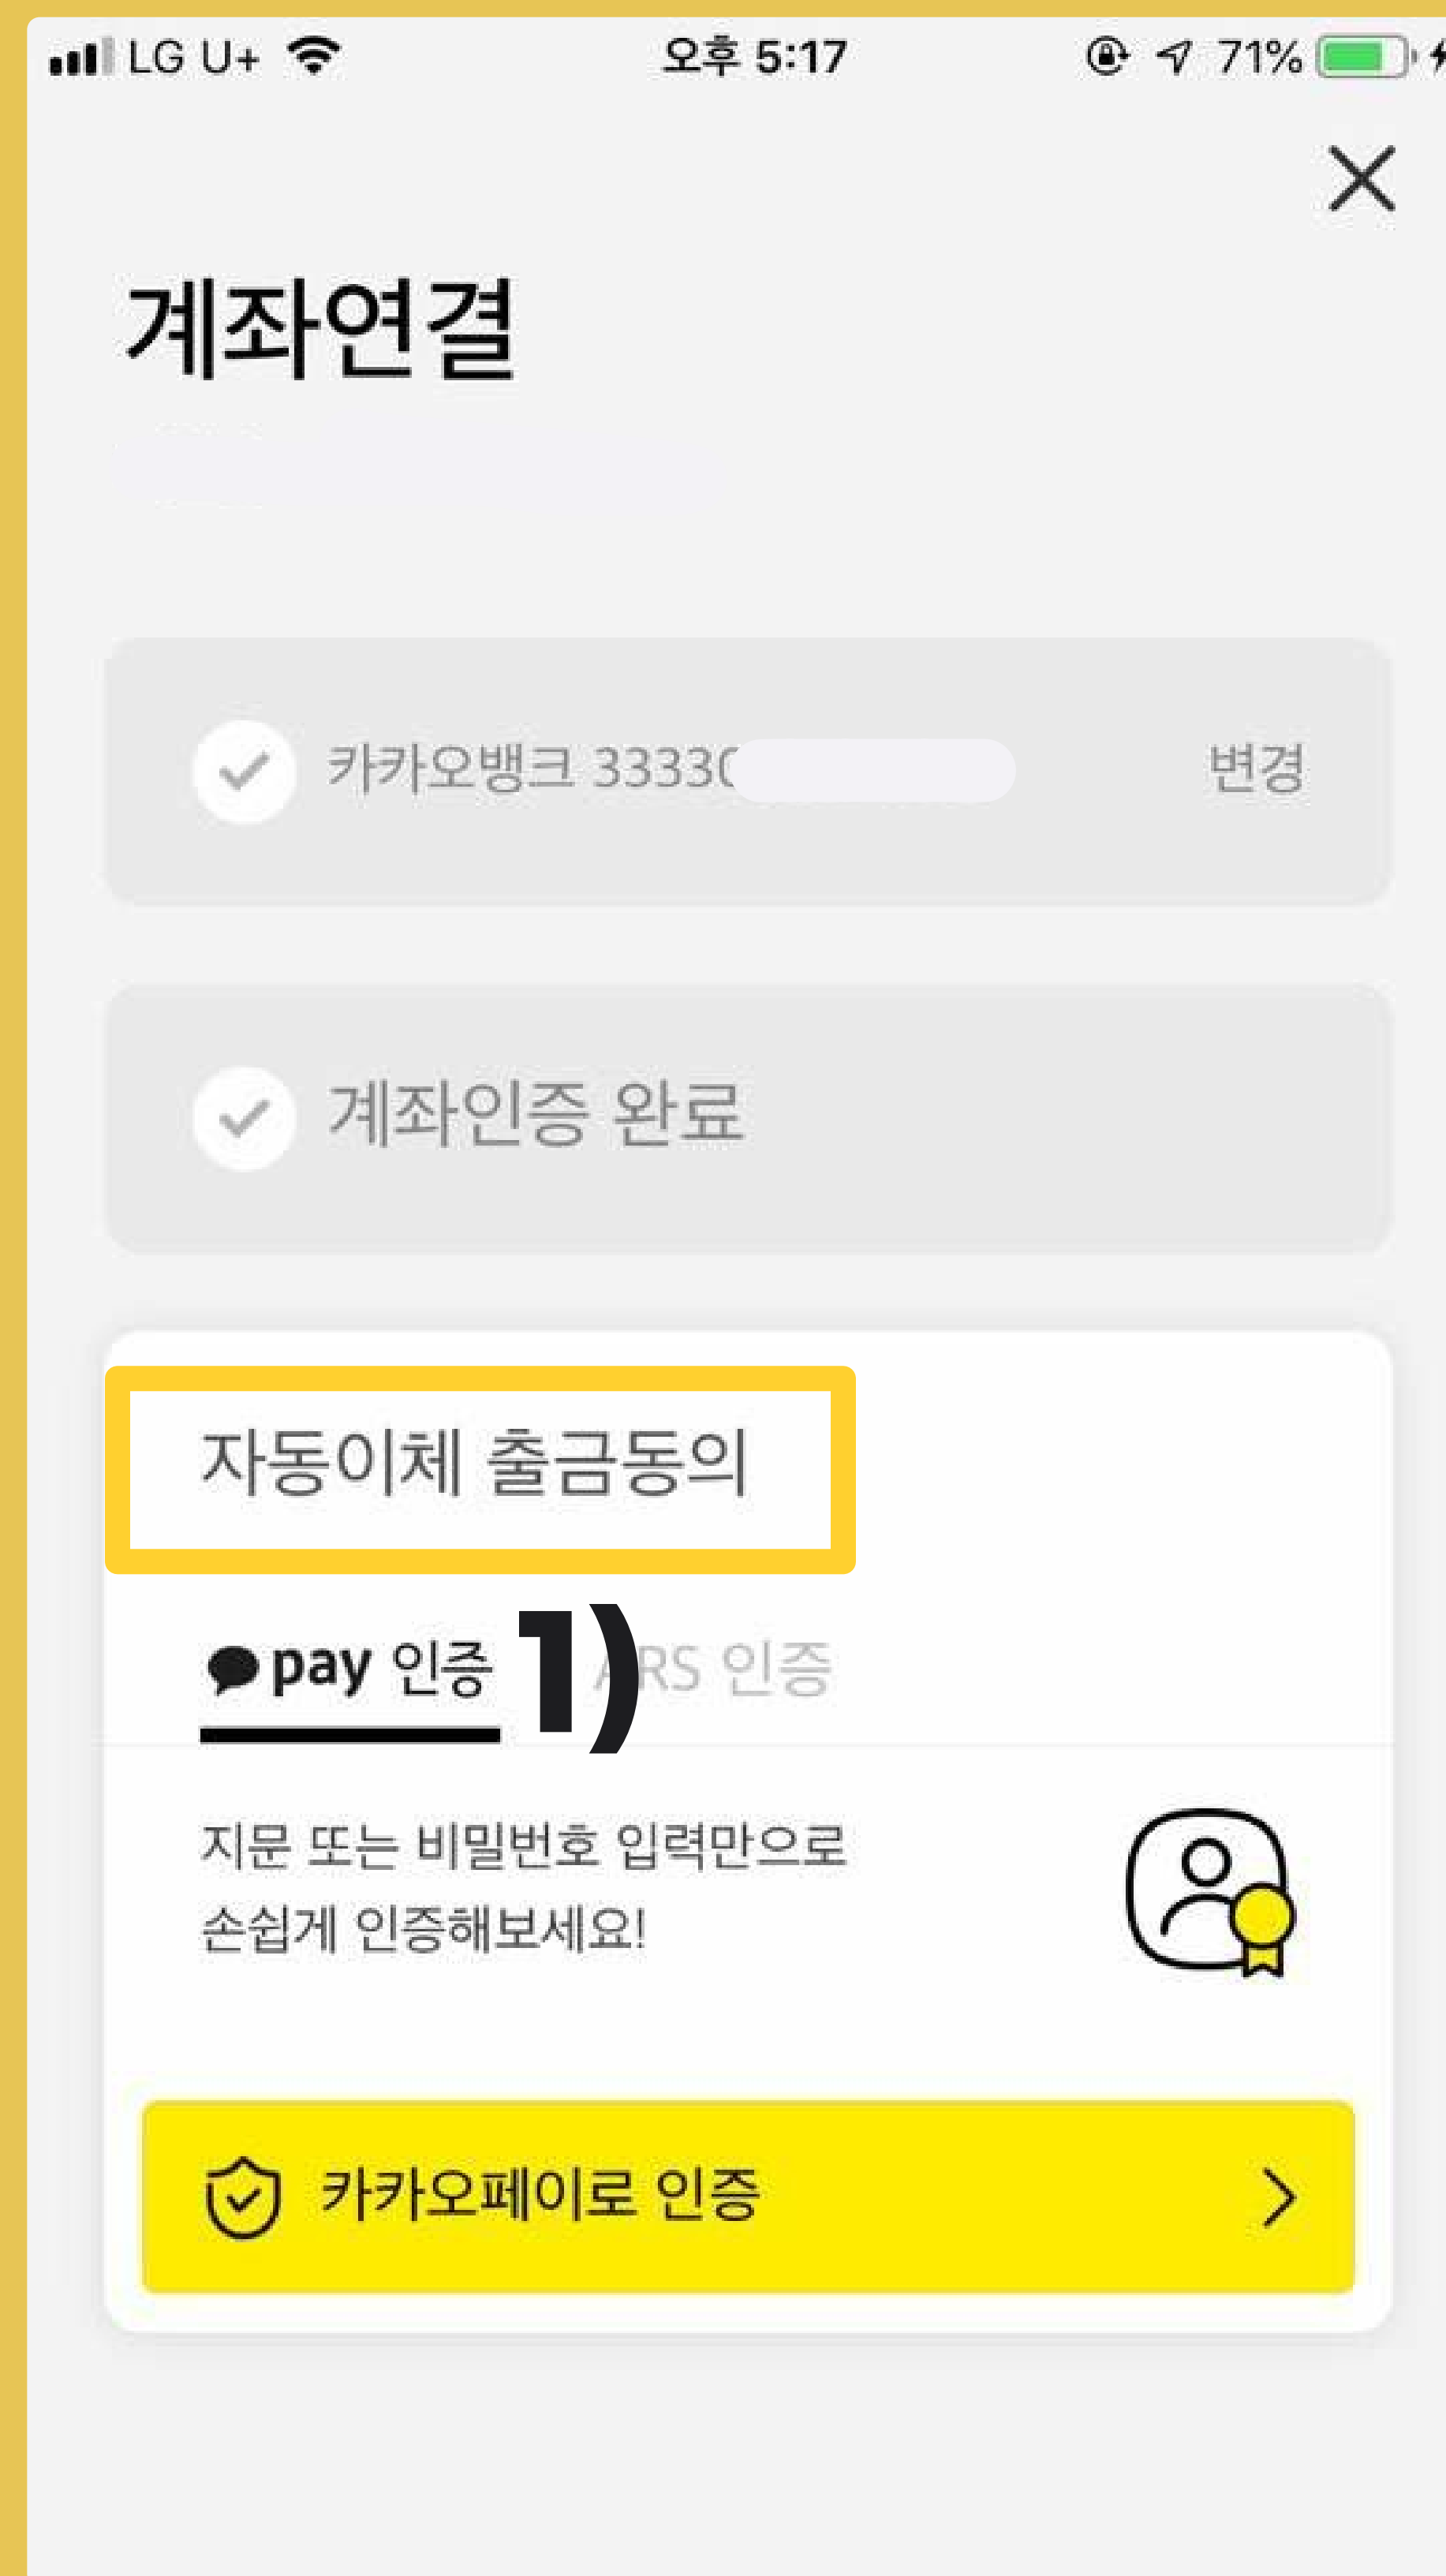

Fill up your bank account number and click "인증요청" (request for verification)

Kakao will send you "1 KRW" to your account to verify it.

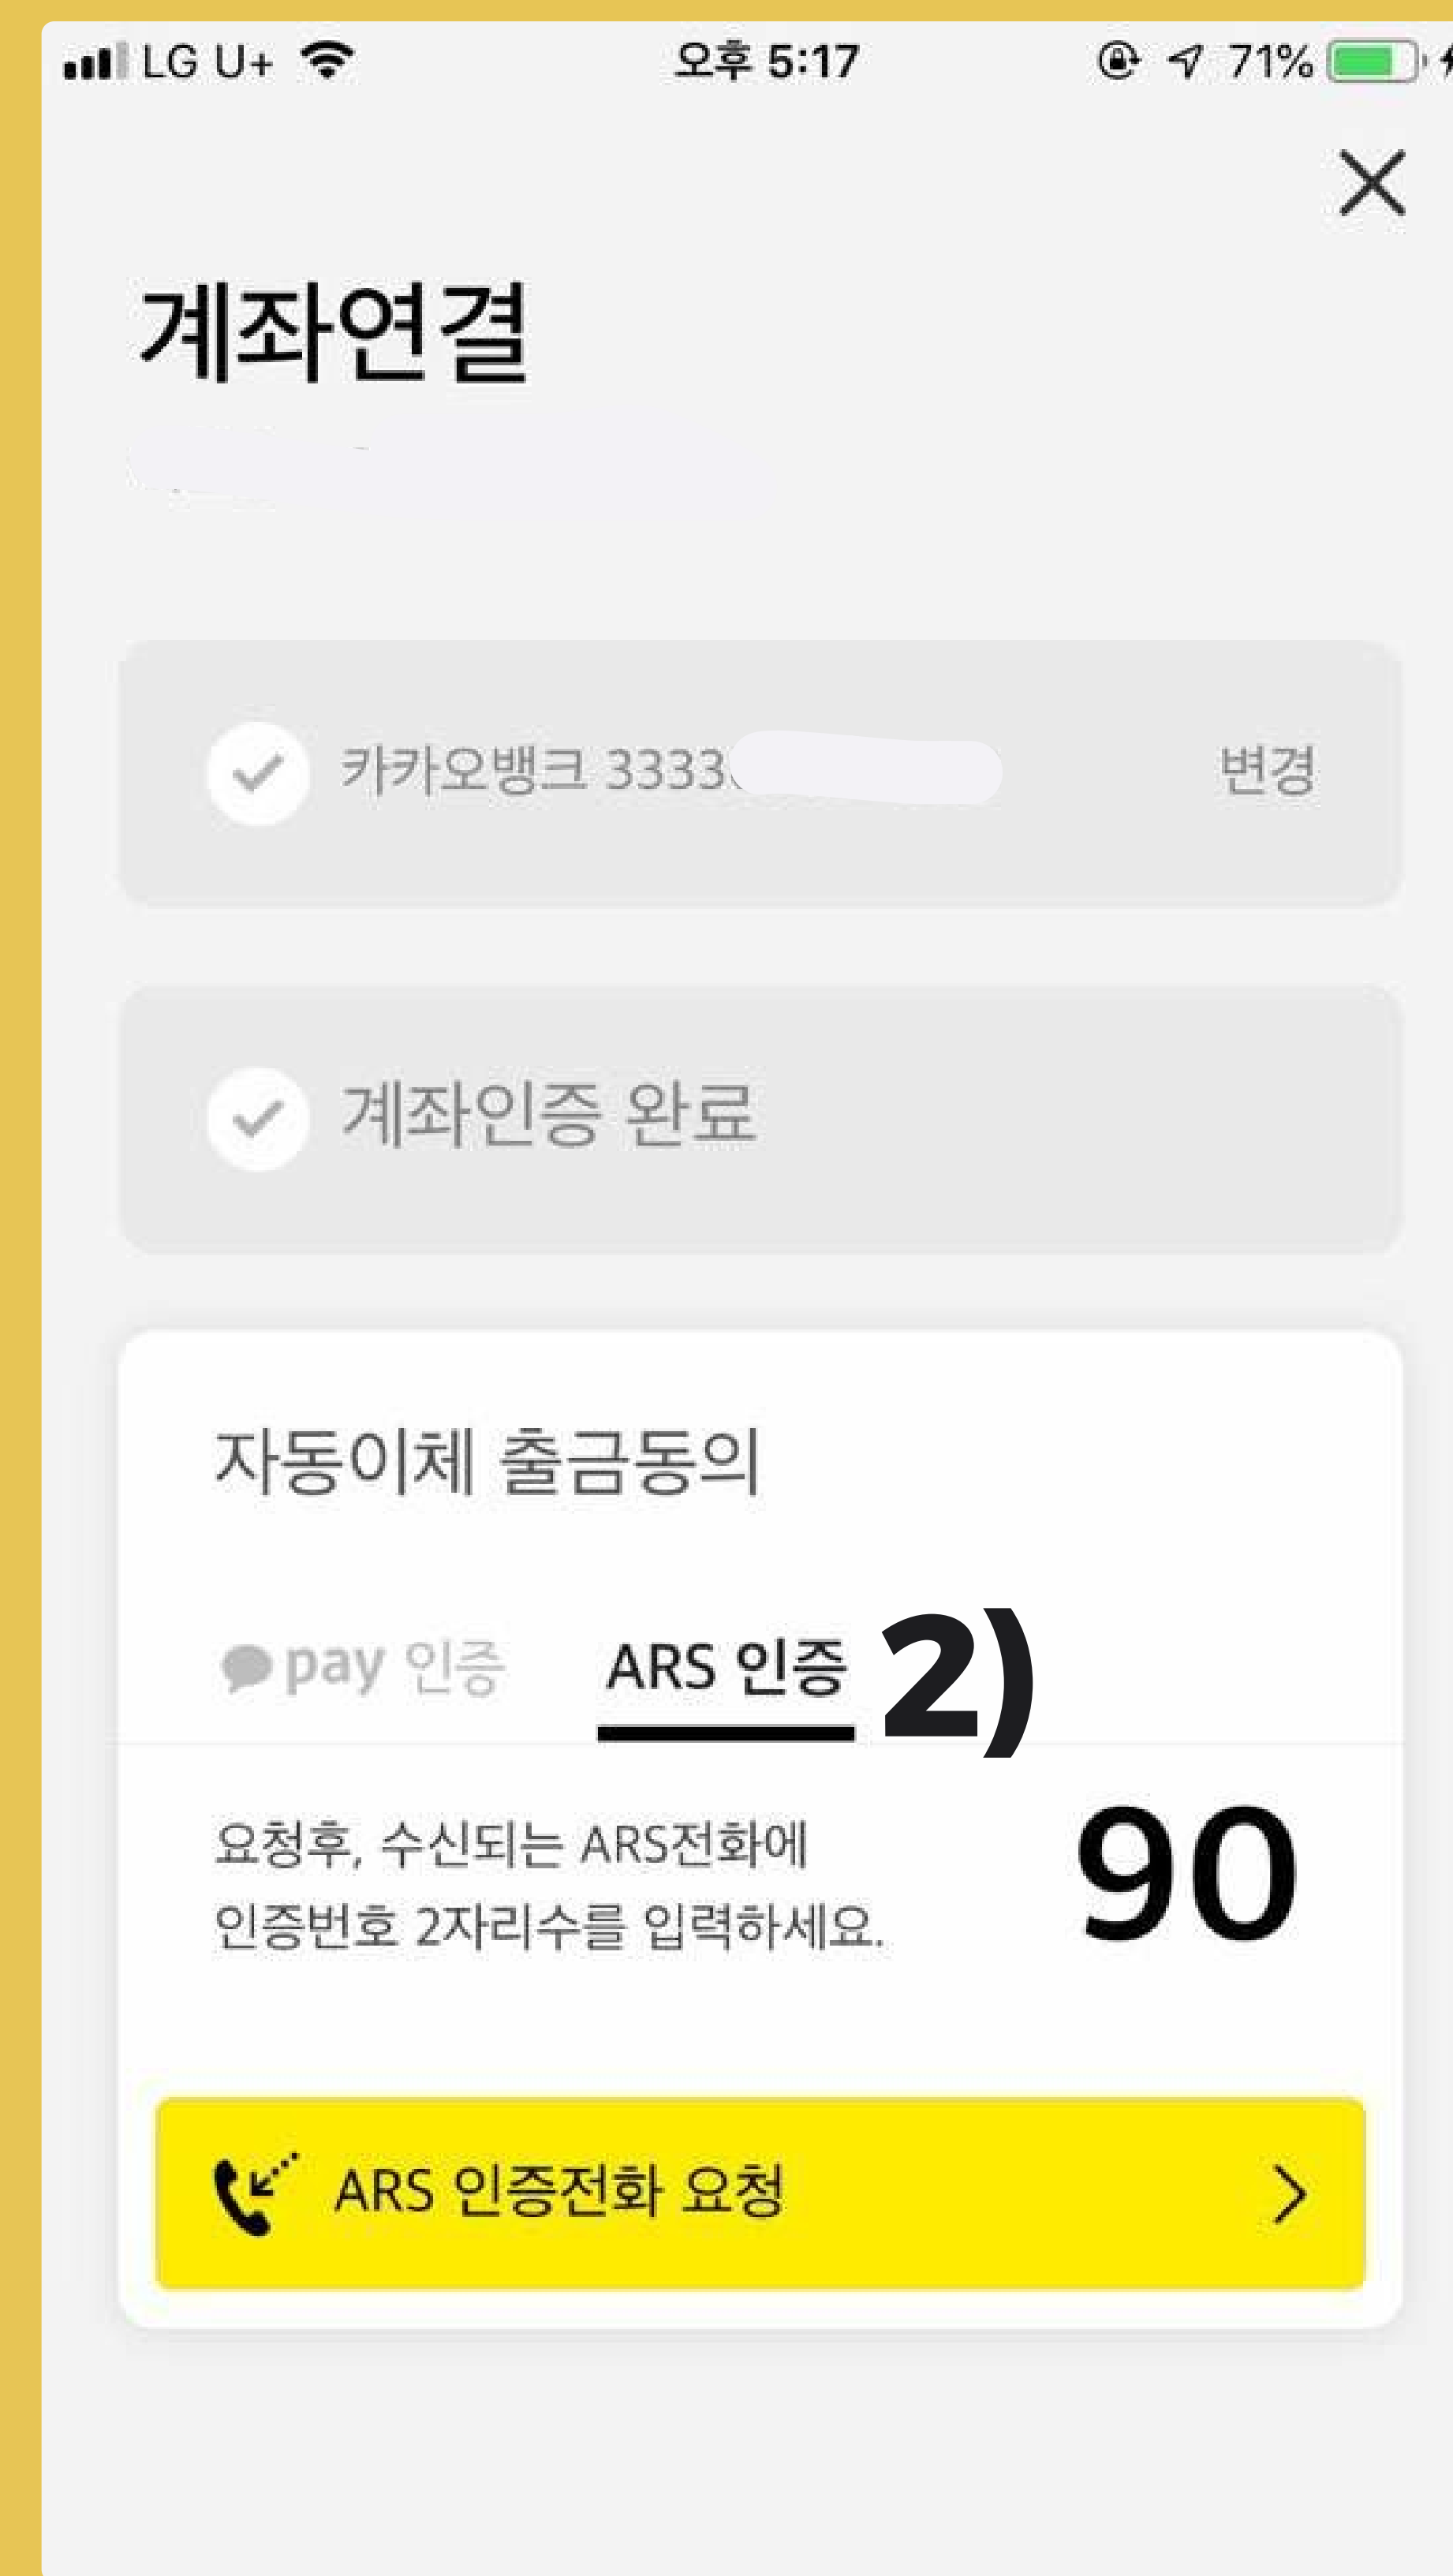

Depositor's name will consist of 4 digits of Korean letter and copy&paste the letter to the 2)blank area.

**\*\* You should already have access to your online banking system (either phone/pc) in order to check the depositor's name or get a text message from the bank for any transactions. If not, you can do it at the ATM machine to check. (It doesn't expire unless you cancel the whole procedure)**

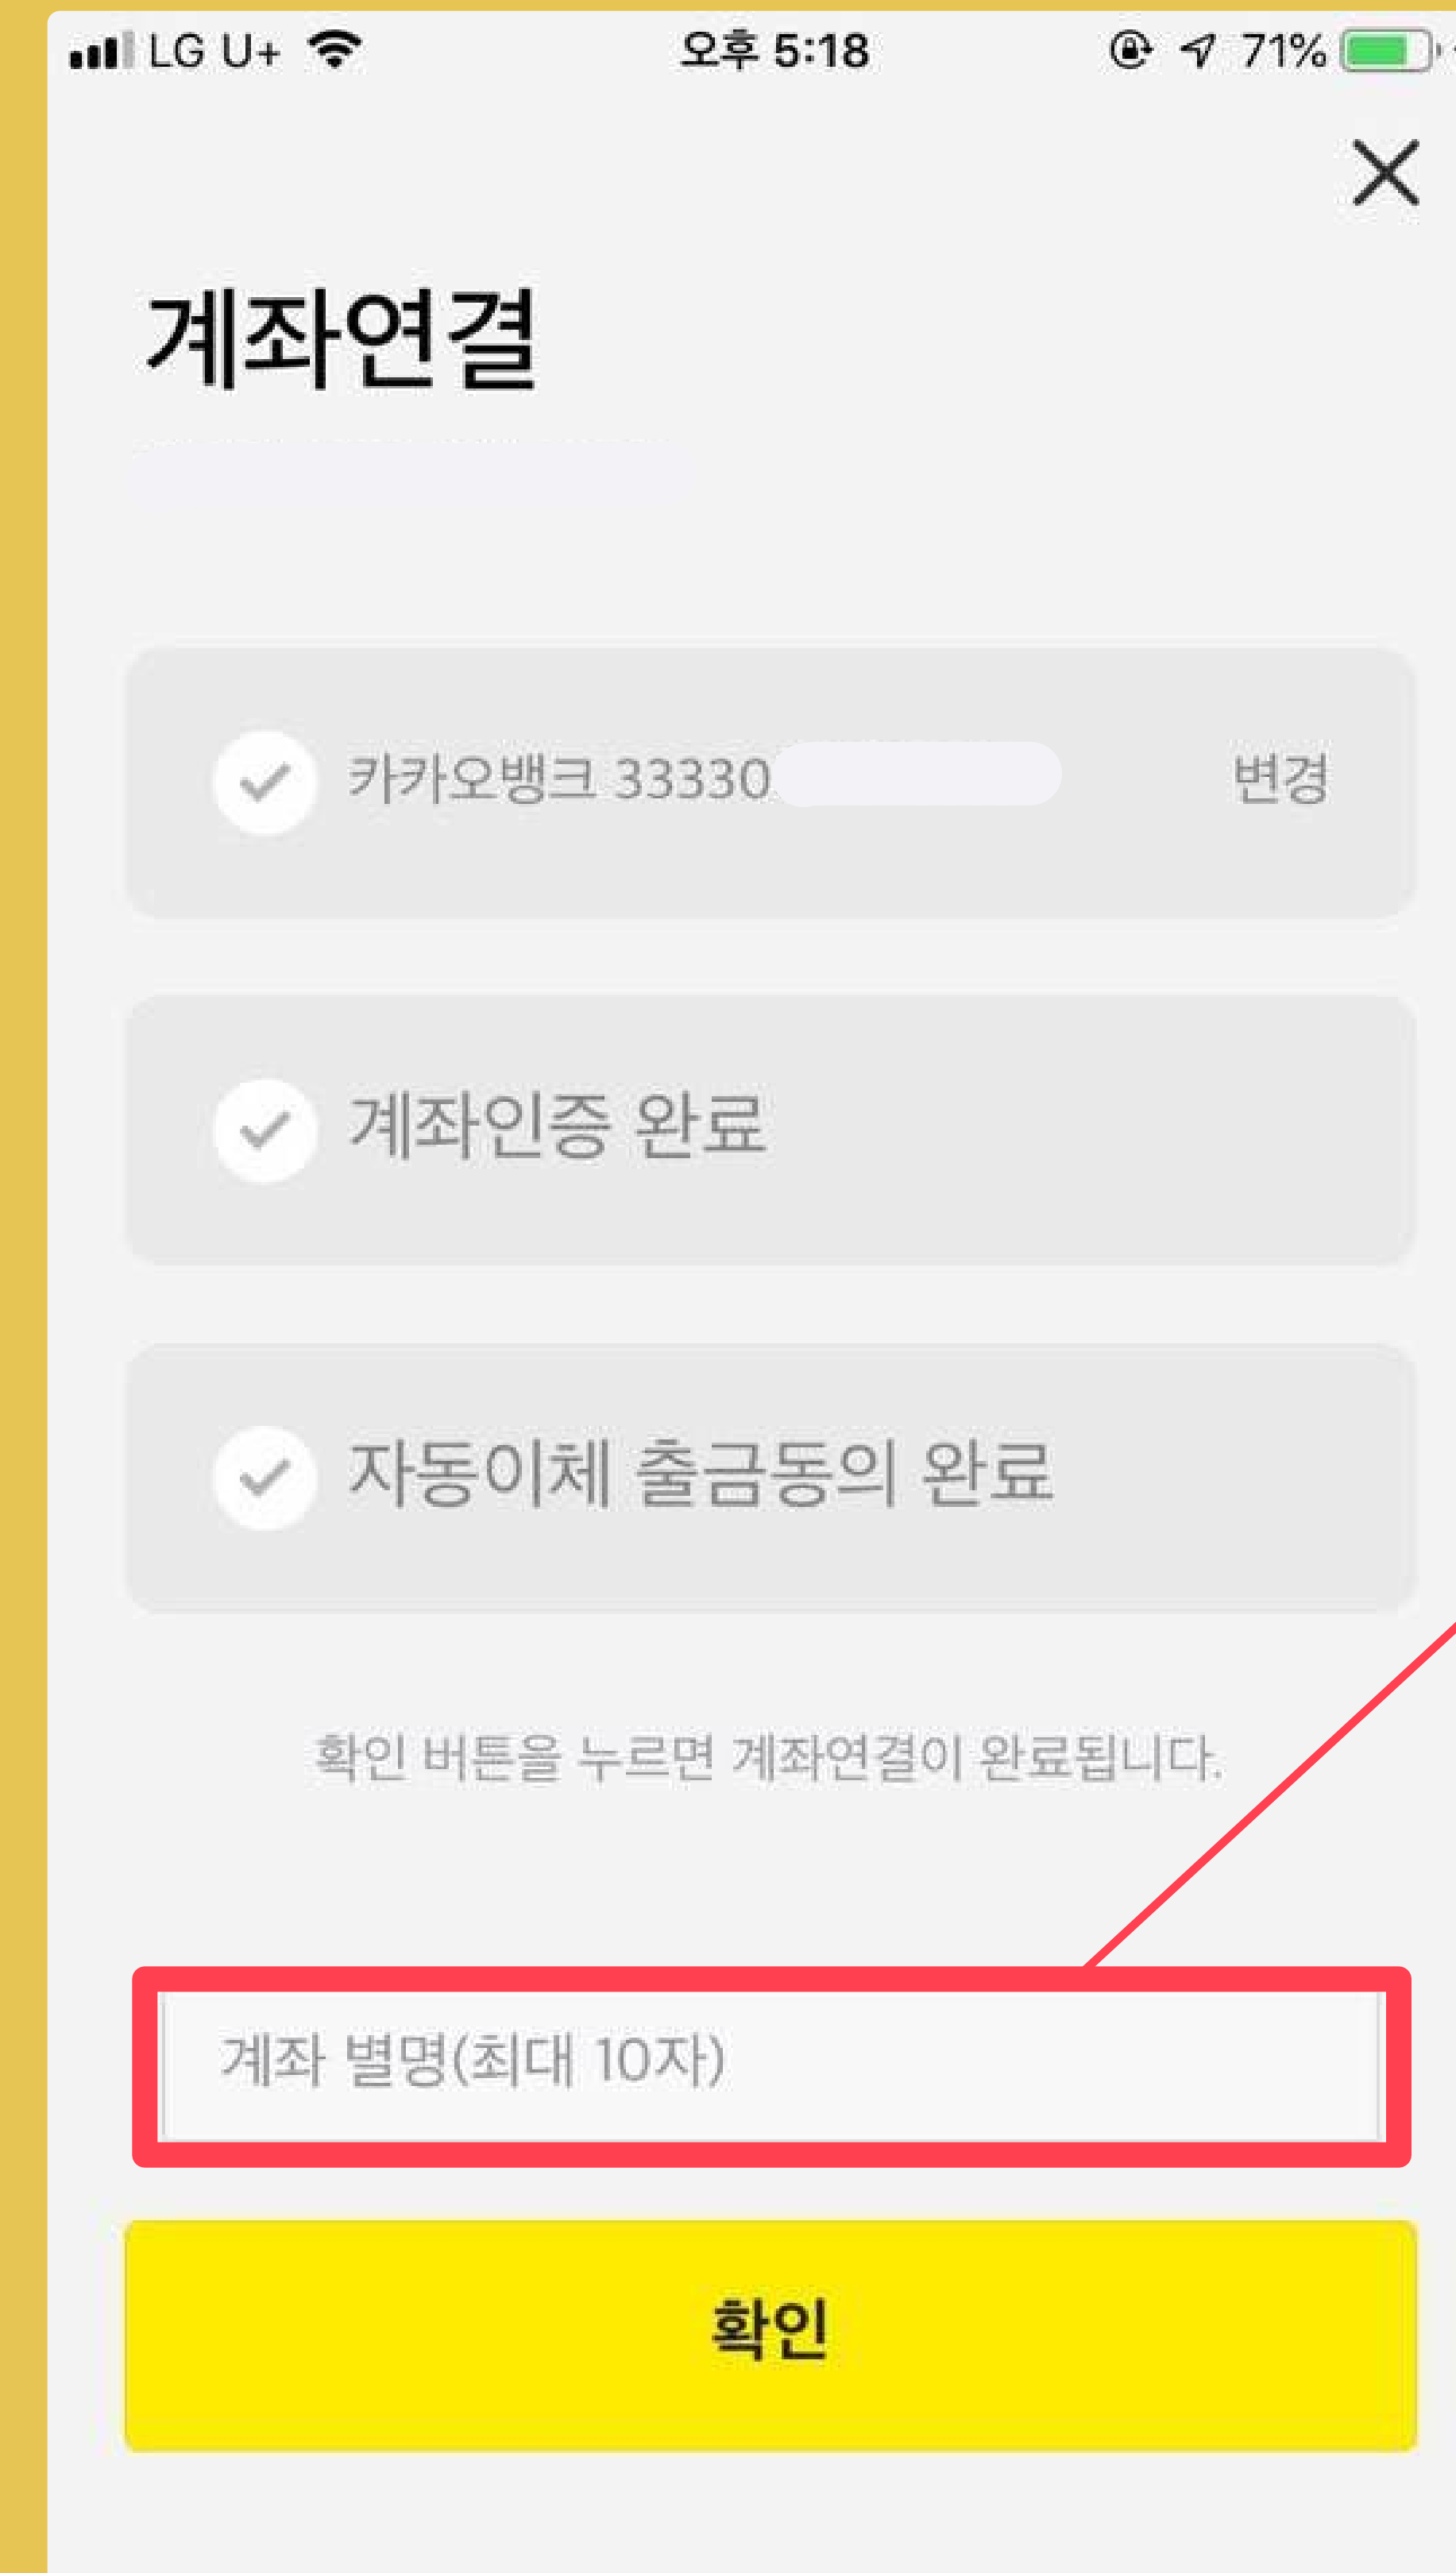

Once the account is verified, Kakao will ask for your consent about taking money from your bank account when trying to pay with Kakao pay.  
(See Remittance Chart flow)

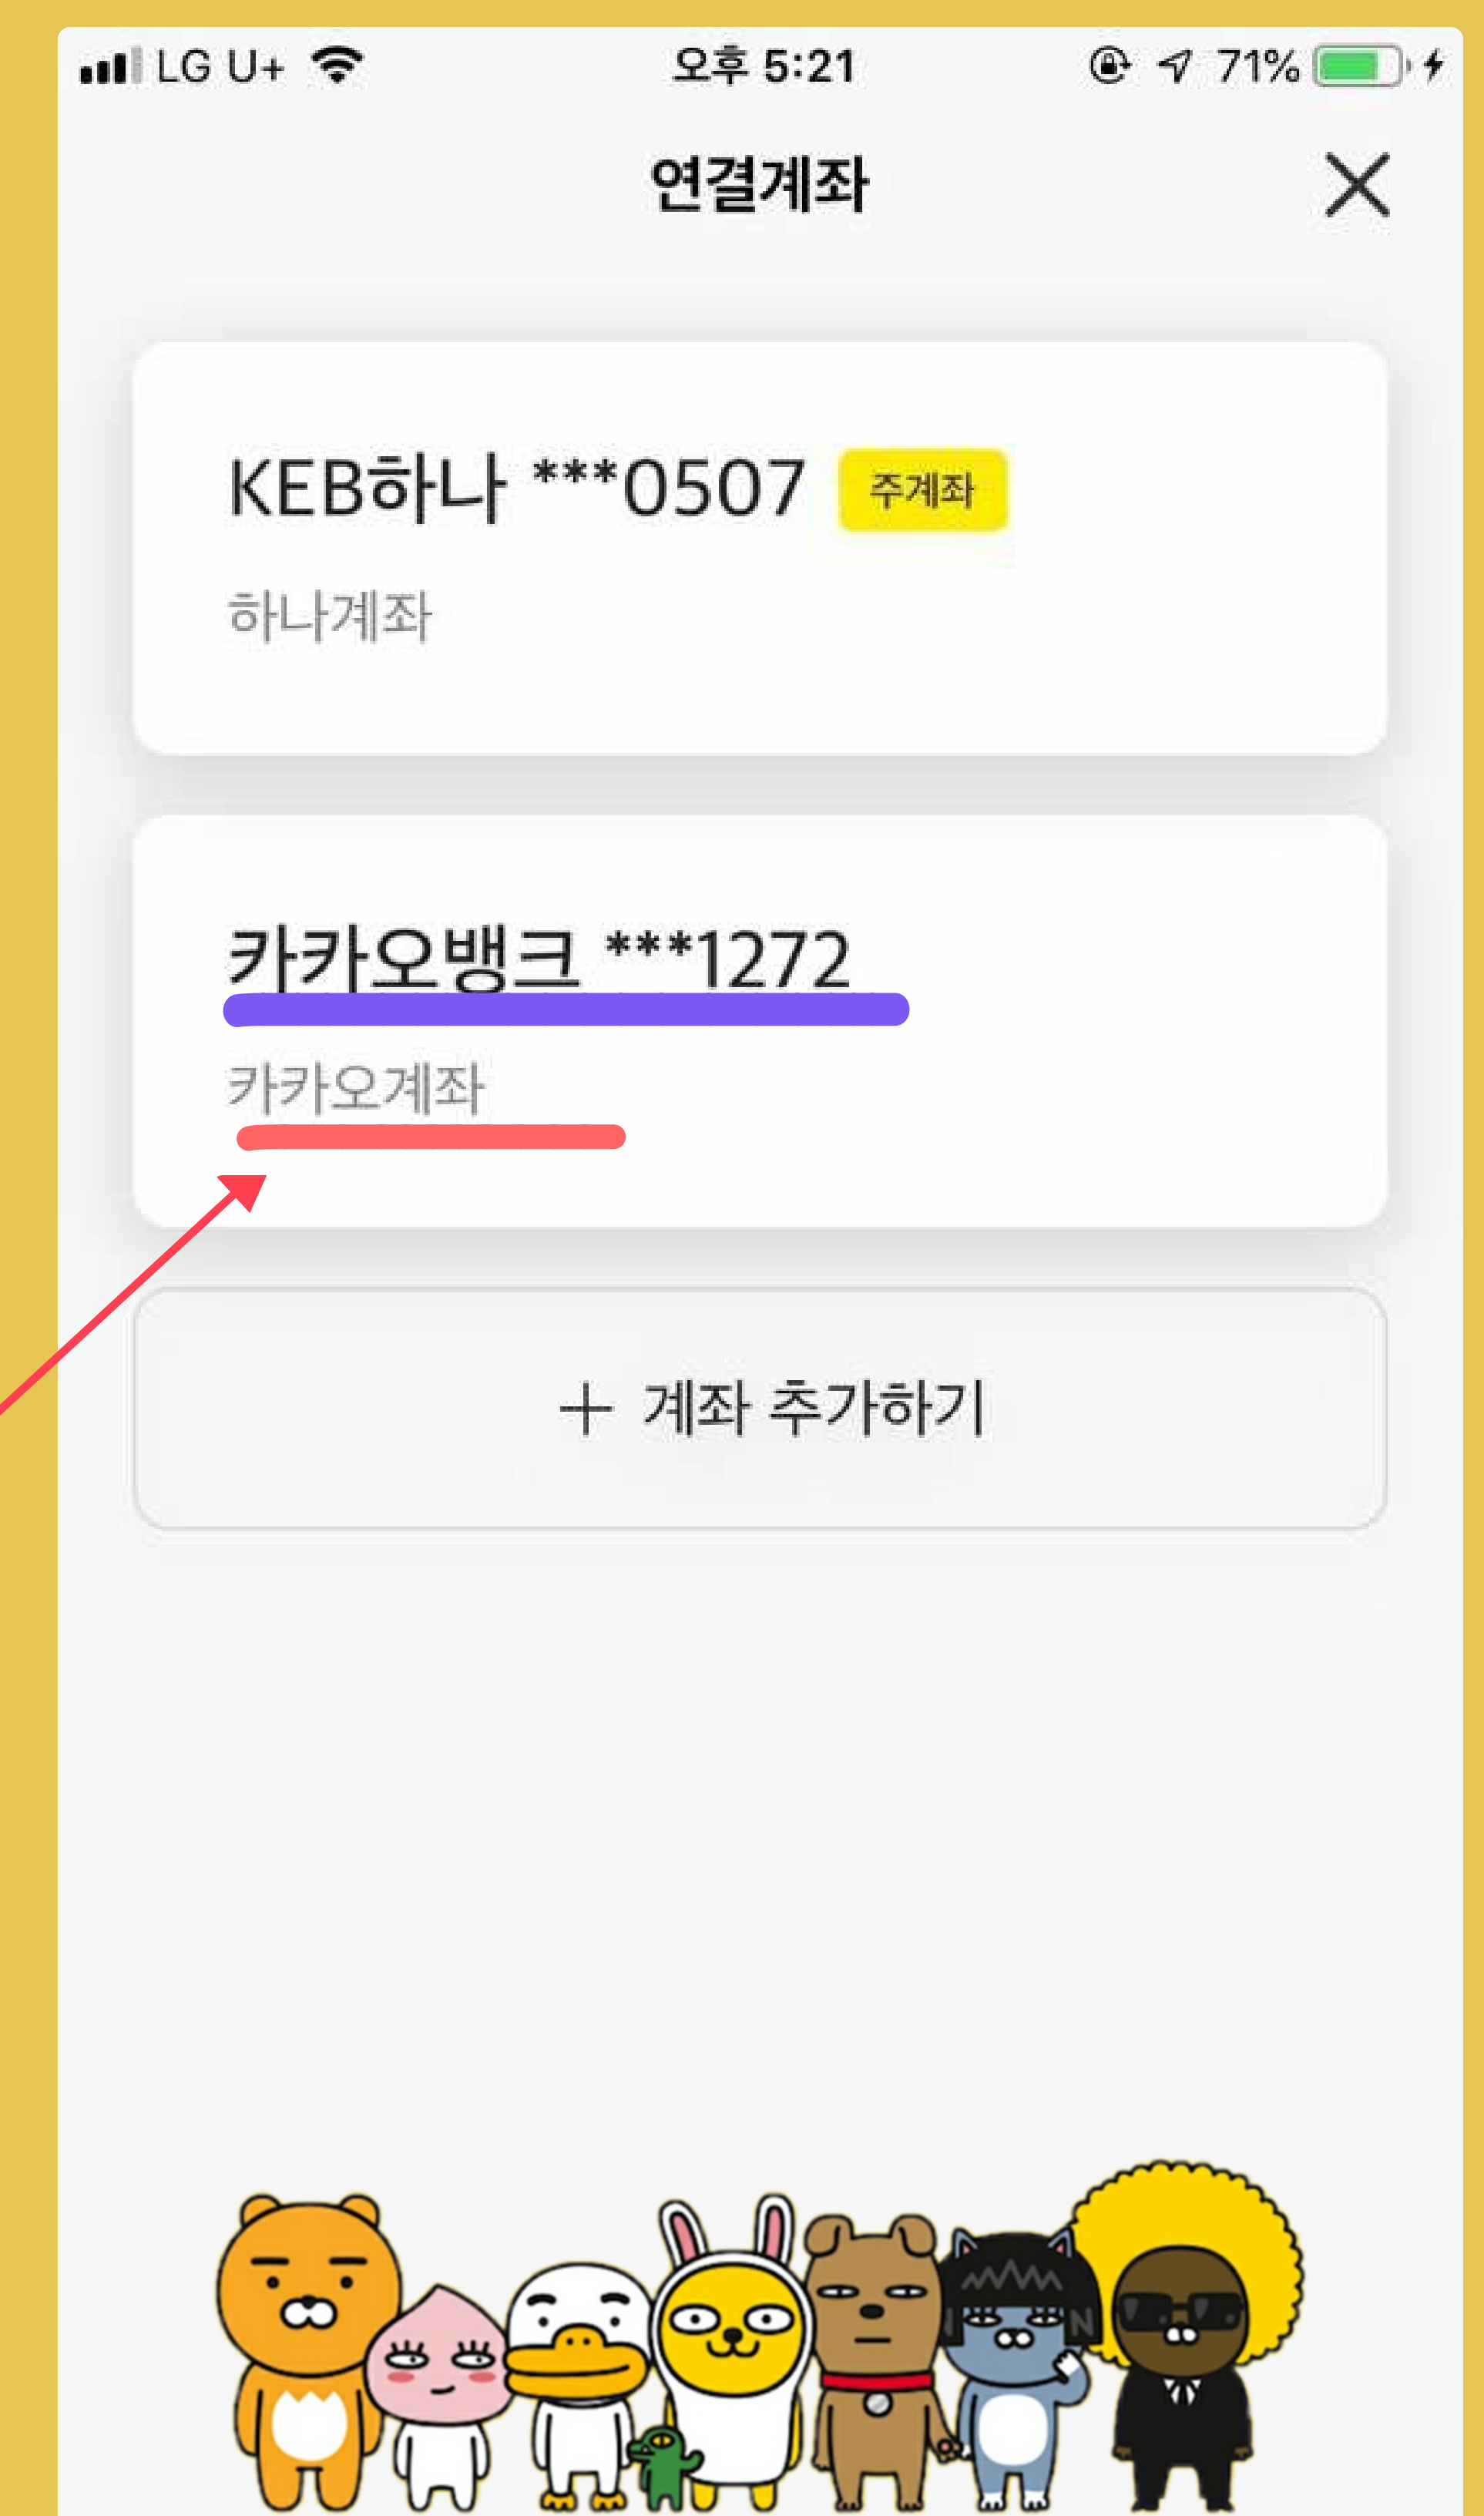

- 1) Kakao pay verification using finger prints/password
- 2) ARS Verification

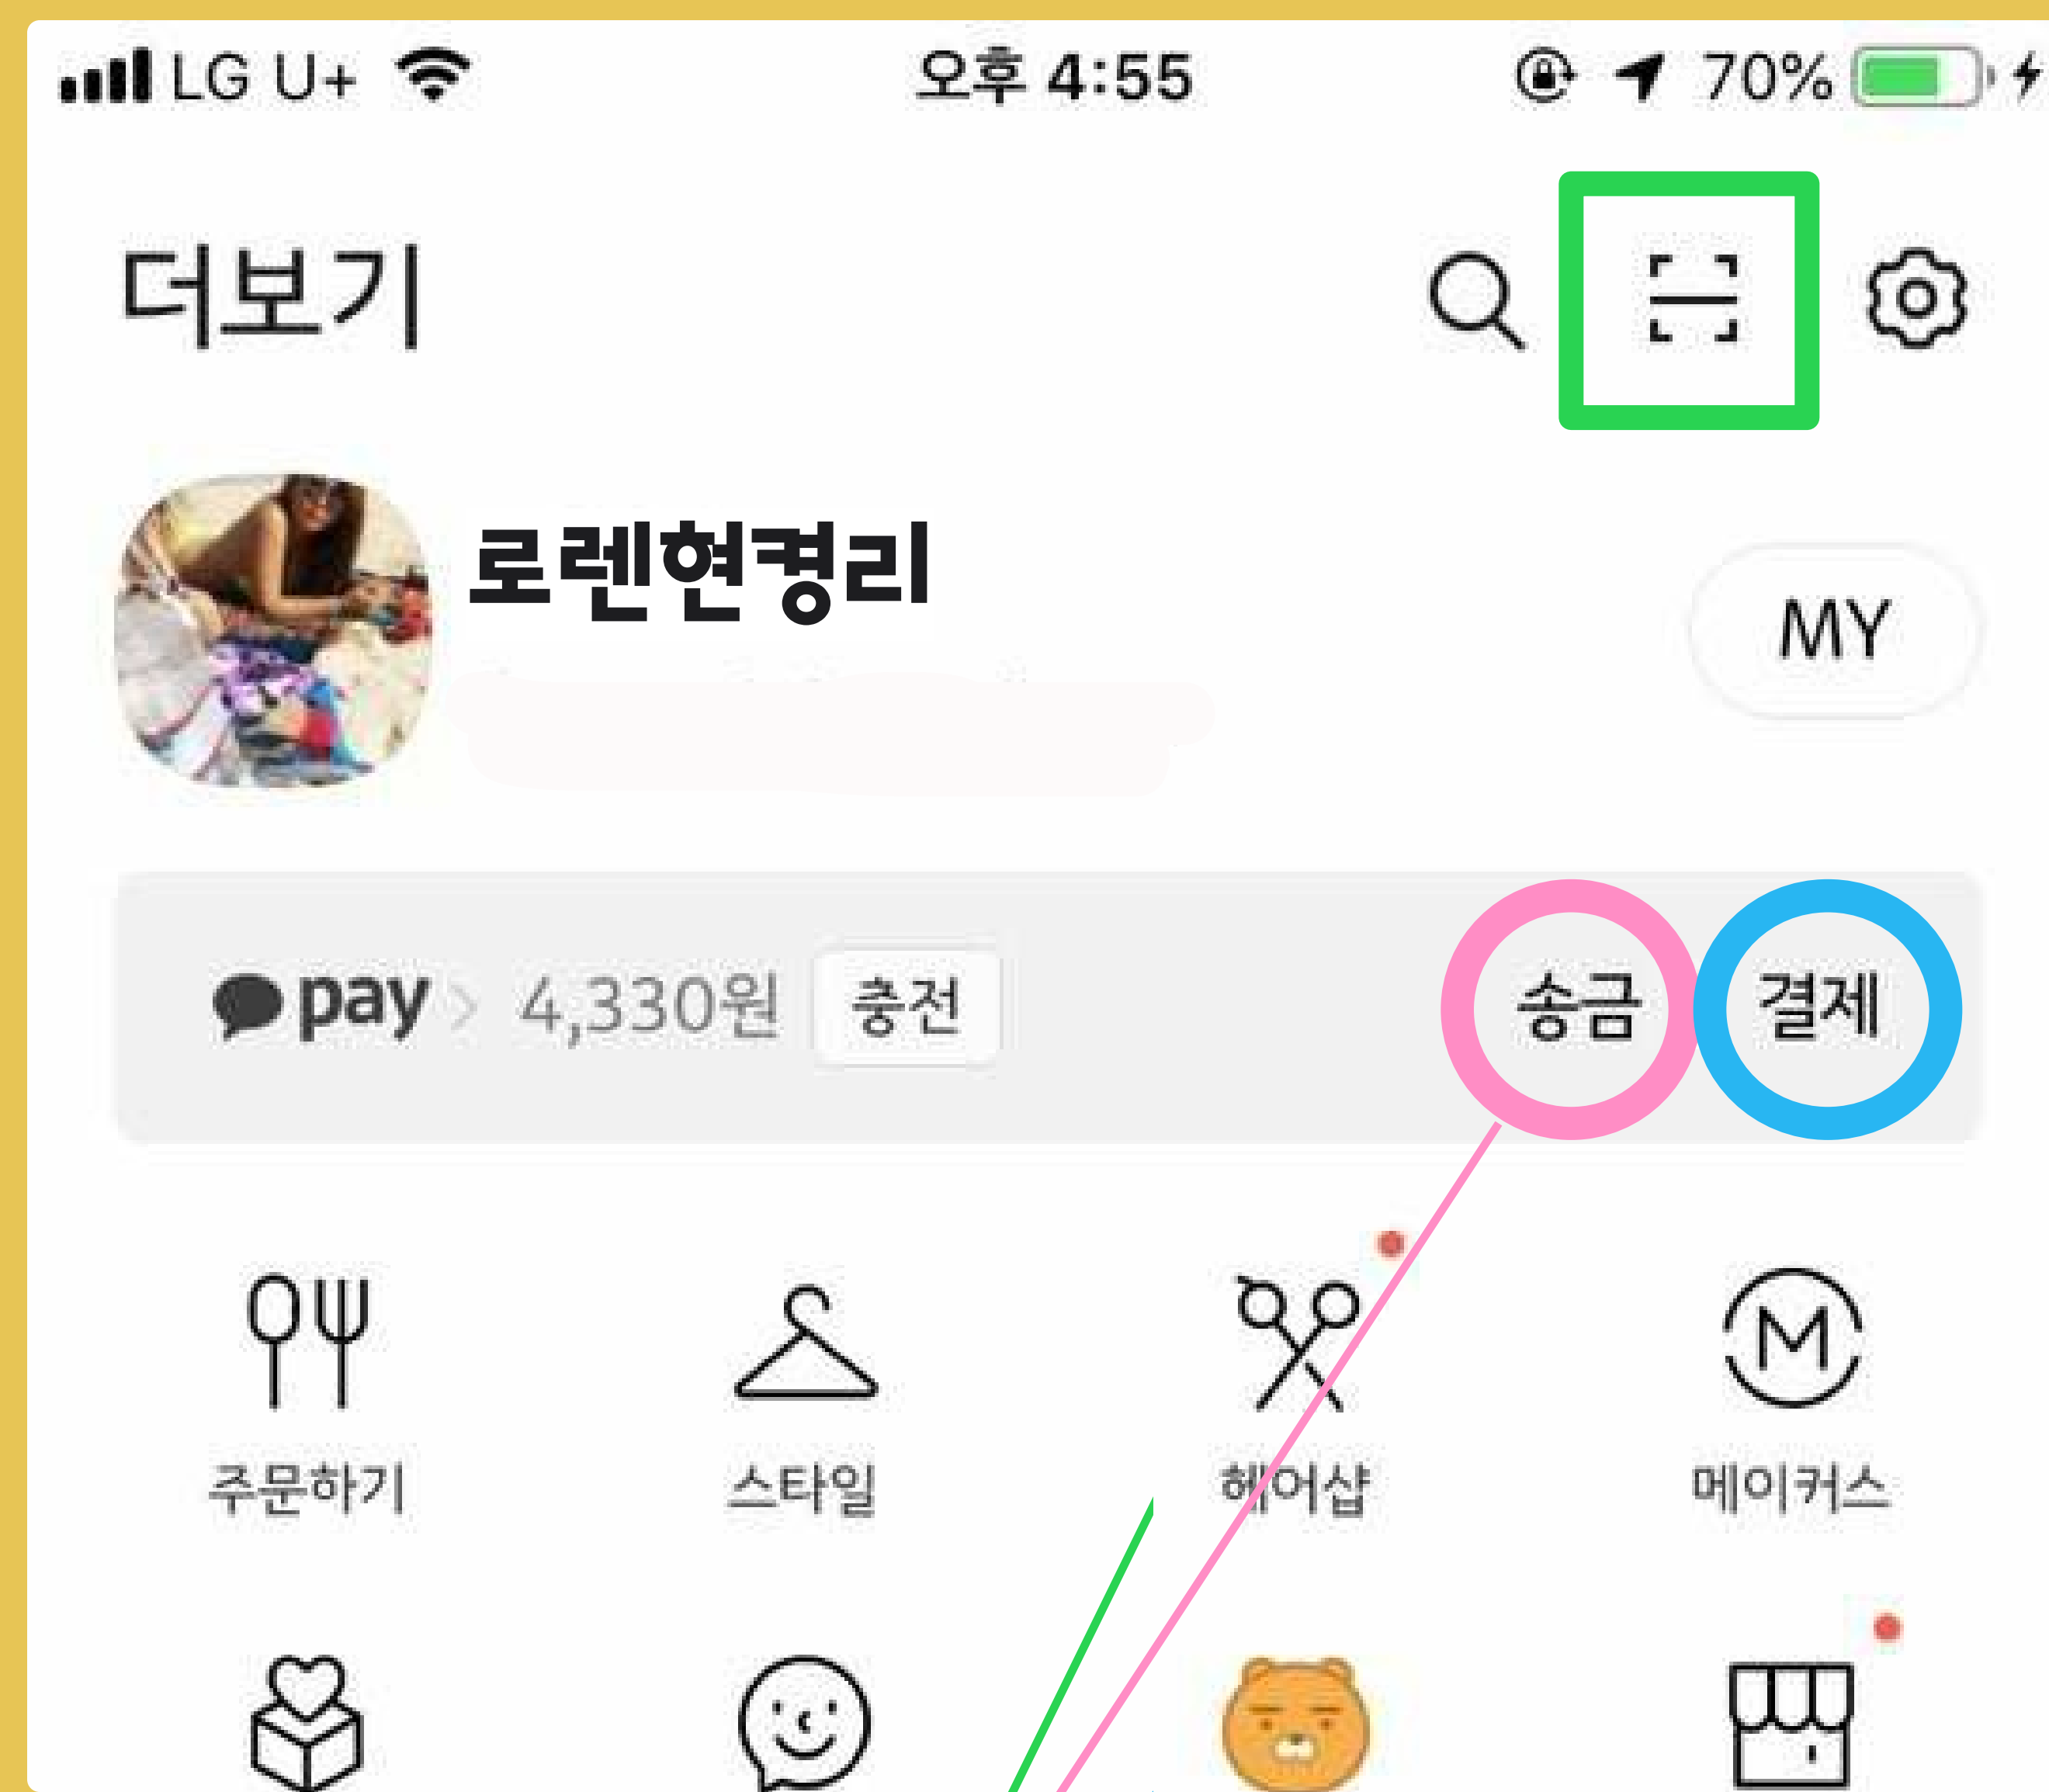

Kakao pay verification requires password settings and certificate we will go with the second option: ARS verification. Click yellow button above then you will get a call from Kakao. Answer the phone, type the 2 digit number you see on your screen. Once the consent process is done, the call will automatically hang up.

Process is done, This step is optional. If you want to set a nickname for the account, you can set it with maximum 10 digits of letters.  
(ex; ShuttleDel)

Now your bank account is connected with your Kakao pay account. When paying with Kakao pay, Kakao will withdraw money from your bank account and then send the money to the place where you want to purchase goods/services.

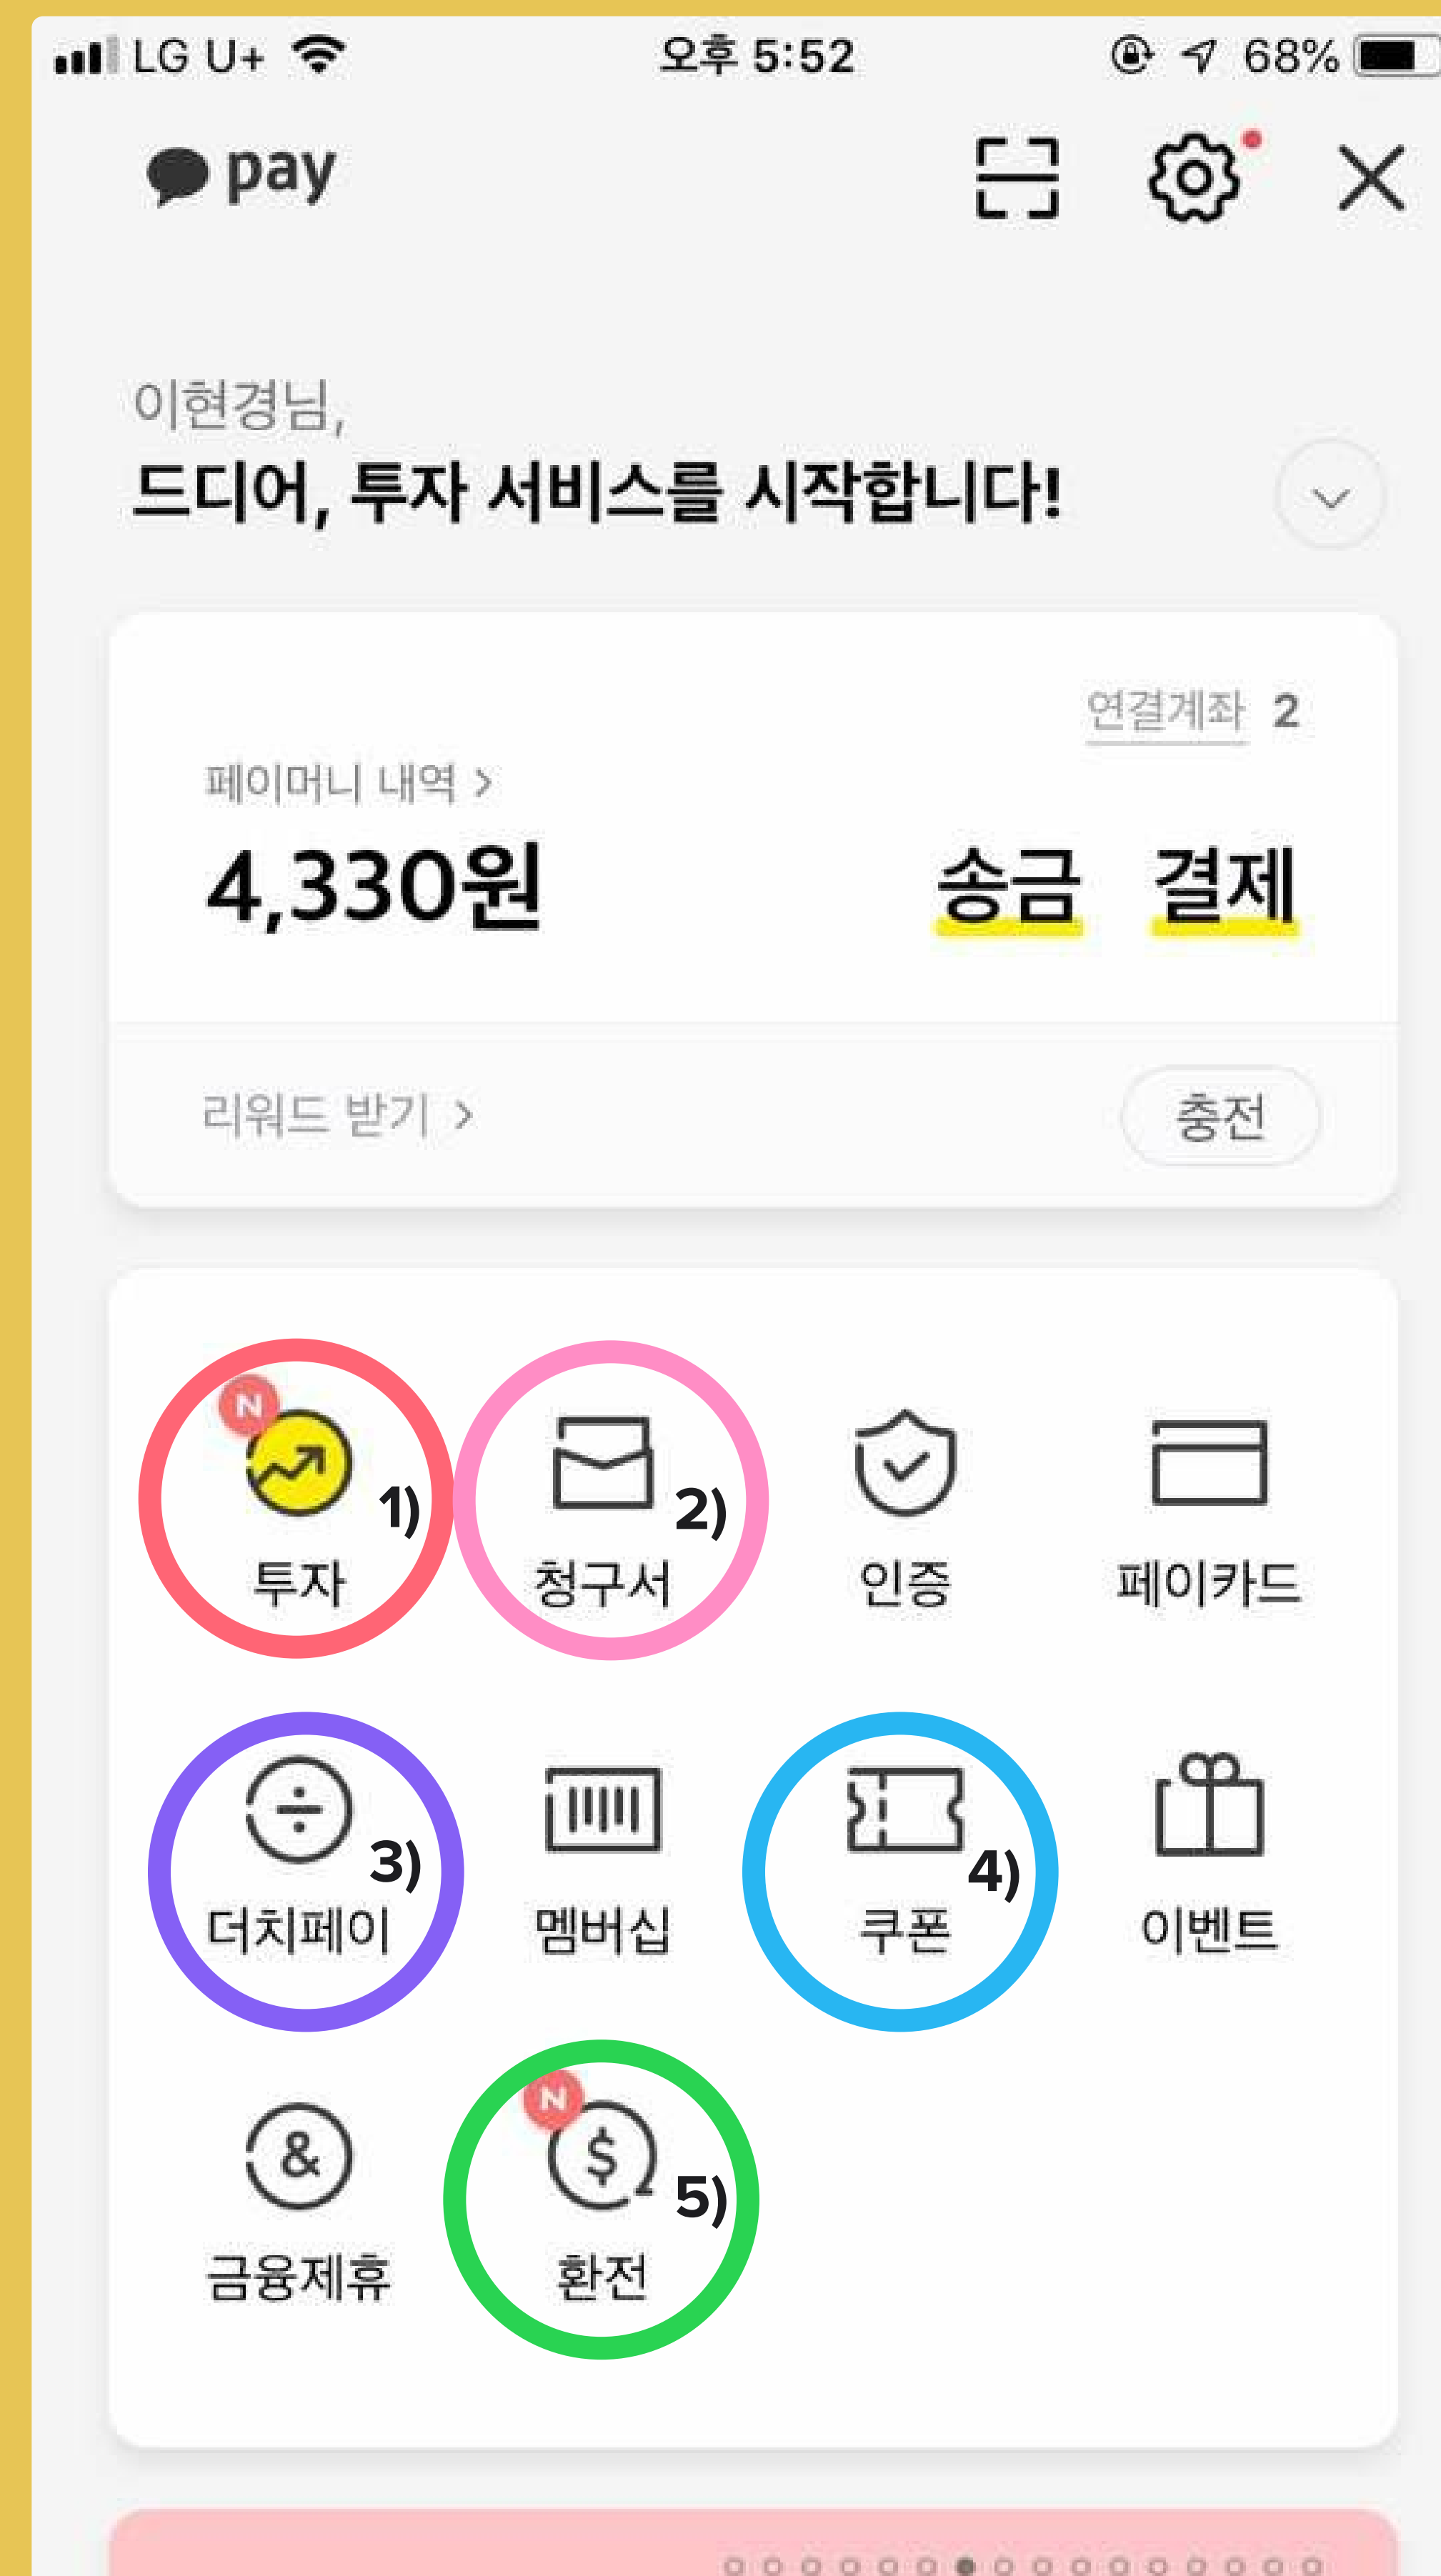

**Now you can pay with QR code,  
transfer money w/o bank  
certificate, and pay things  
on/offline without your**

**WALLET!**

***More to offer!***
